

IEEE 802.1 RESOLUTION - Albuquerque, Thursday March 9th, 2000 A.D.

Whereas:

- 1) Bill Lidinsky has been the Chair of the IEEE 802.1 Working Group for the best part of Two Decades;
- 2) Under his leadership, 802.1 has developed standards that have been of Major Significance in the Development of the LAN Industry;
- 3) He has performed his duties as Chair with Consummate Skill and Good Humour;
- 4) He has steadfastly demonstrated his disrespect for needless bureaucracy, as epitomized by his invention and application of the "Principle of Random Compliance";
- 5) He has consistently applied the principles of Consensus Generation to his chairmanship, despite the onward march of Roberts' Rules of Order through the fabric of IEEE 802;
- 6) He has, against our wishes, Fallen Victim to the bureaucratic rule that limits terms of office for Working Group Chairs,

Therefore:

We, the participants in IEEE 802.1, wish to express our Appreciation of Bill's considerable contribution to our work, our Heartfelt Thanks, and our Best Wishes as Bill retires from the Chair.
