

# MSRP Redundant Stream Reservation Proposal

Contributed by Philippe Klein, PhD

Aug 2013

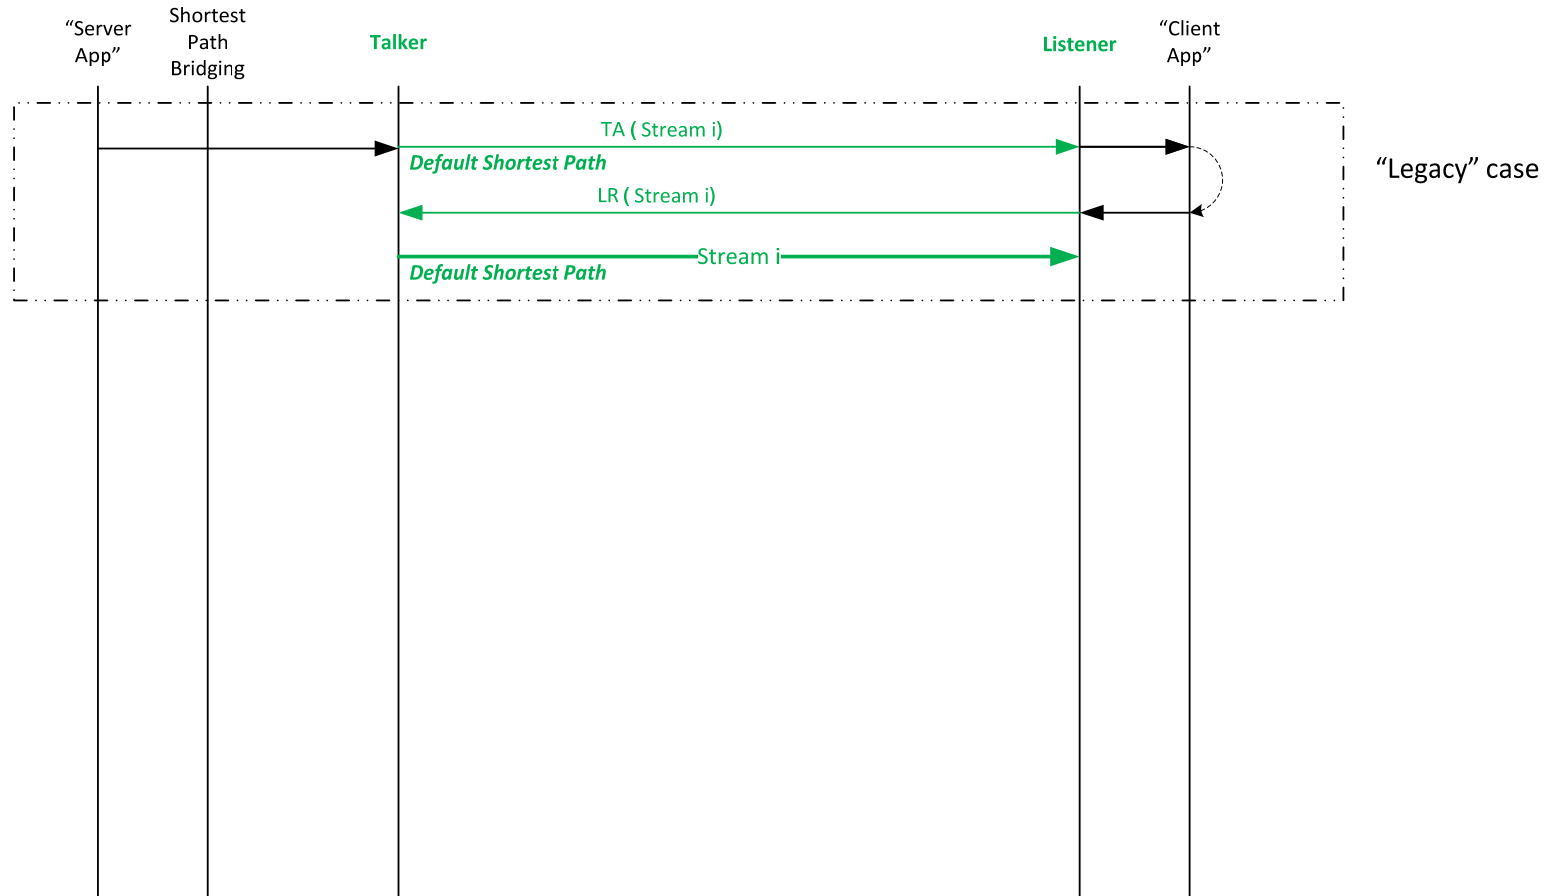

# Proposal Aims

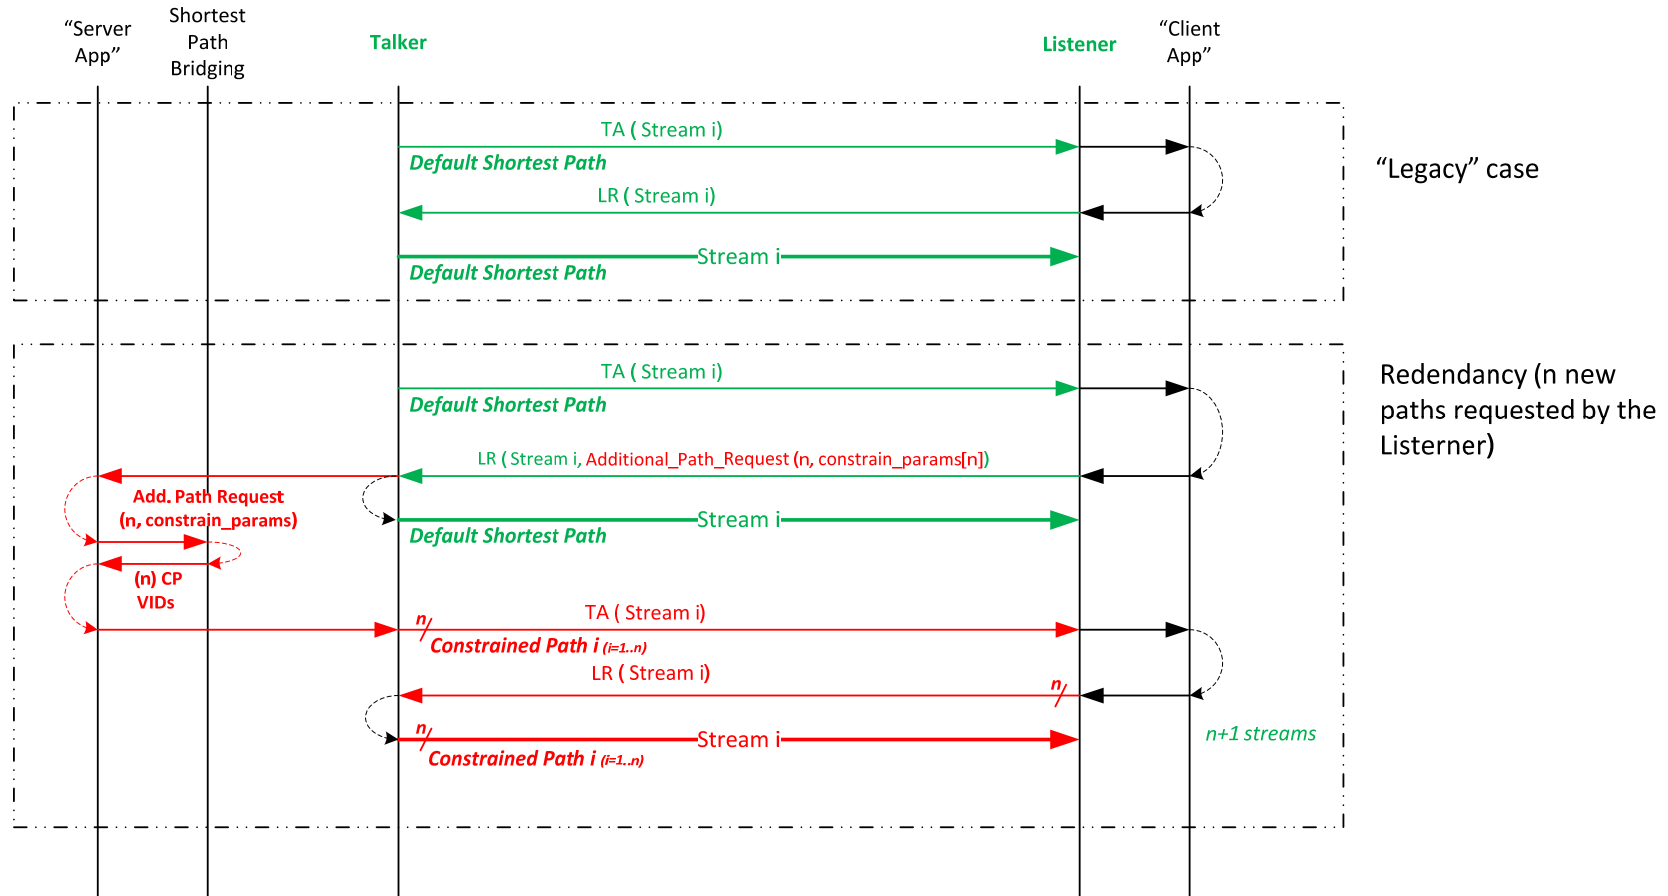

- Keep a clear separation between reservation and path selection
- Minimize the modifications to the current MSRP reservation protocol
- Rely on SPB to select best and constrained the stream paths
- Leave the redundancy scheme and characteristics a listener choice

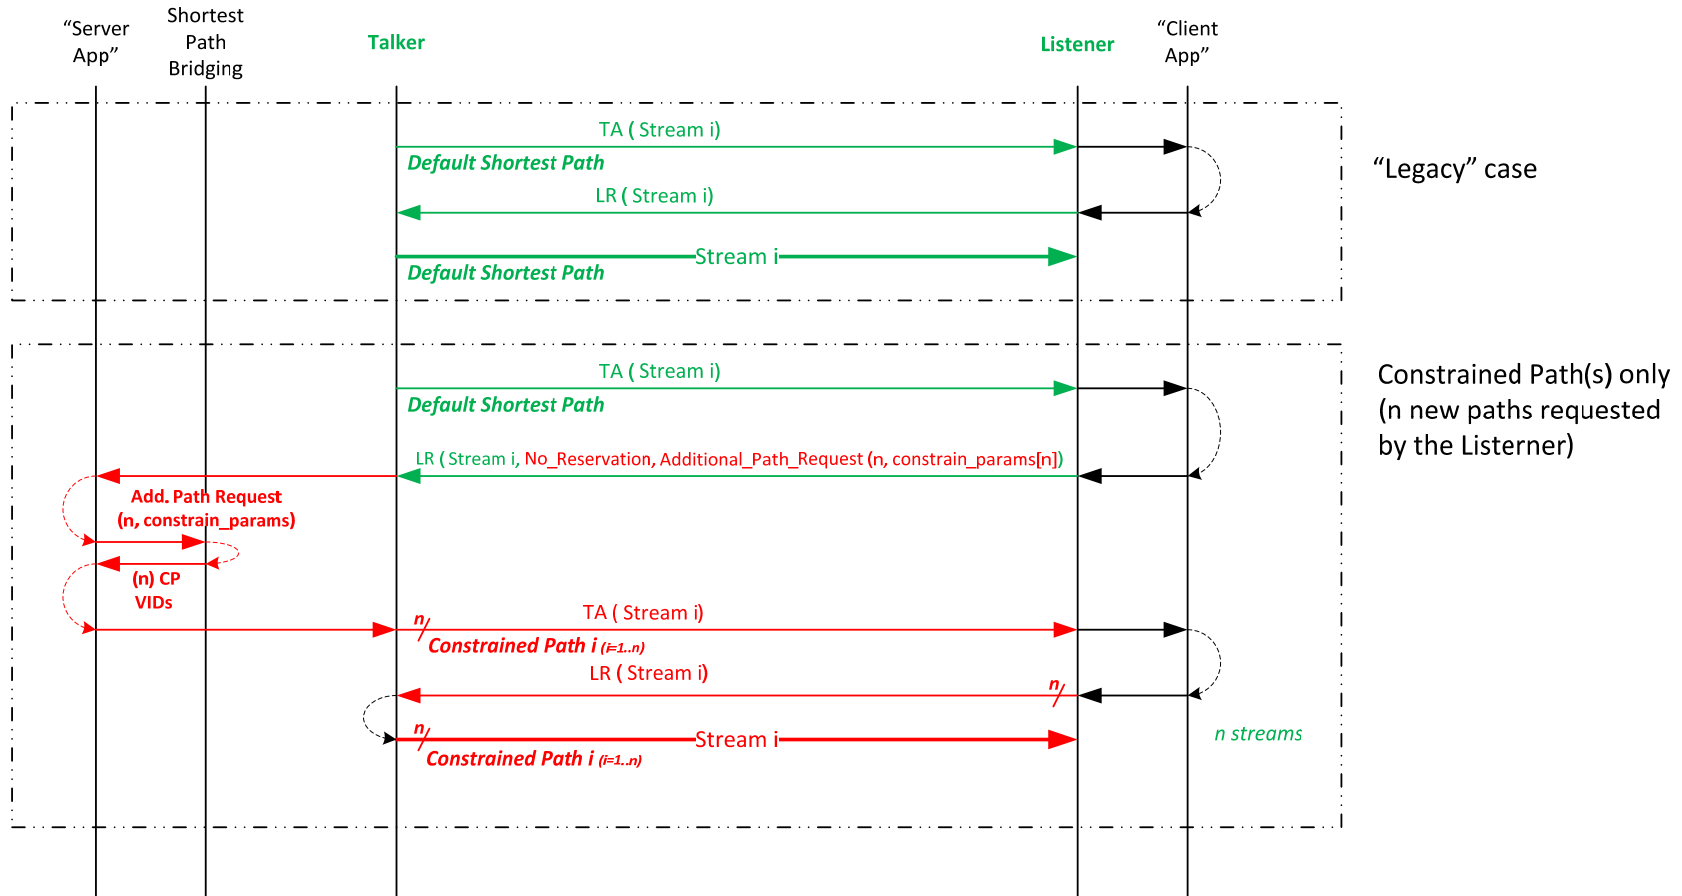

# MSRP – “Legacy” scenario

# MSRP 1+n Redundant Streams

# MSRP – n Constrained Streams only

# Thank You
