

# P802.1Qcd

---

**Submitter Email:** [pthaler@broadcom.com](mailto:pthaler@broadcom.com)

**Type of Project:** Modify Existing Approved PAR

**PAR Request Date:** 17-Mar-2014

**PAR Approval Date:**

**PAR Expiration Date:**

**Status:** Unapproved PAR, Modification to a Previously Approved PAR for an Amendment

**Root PAR:** P802.1Qcd **Approved on:** 21-Oct-2013

---

**1.1 Project Number:** P802.1Qcd

**1.2 Type of Document:** Standard

**1.3 Life Cycle:** Full Use

---

**2.1 Title:** Standard for Local and metropolitan area networks--Media Access Control (MAC) Bridges and Virtual Bridged Local Area Networks Amendment: Application Virtual Local Area Network (VLAN) Type, Length, Value (TLV)

---

**3.1 Working Group:** Higher Layer LAN Protocols Working Group (C/LM/WG802.1)

**Contact Information for Working Group Chair**

**Name:** Anthony Jeffree

**Email Address:** [tony@jeffree.co.uk](mailto:tony@jeffree.co.uk)

**Phone:** +44-161-973-4278

**Contact Information for Working Group Vice-Chair**

**Name:** Glenn Parsons

**Email Address:** [gparsons@ieee.org](mailto:gparsons@ieee.org)

**Phone:** 613-667-1569

---

**3.2 Sponsoring Society and Committee:** IEEE Computer Society/LAN/MAN Standards Committee (C/LM)

**Contact Information for Sponsor Chair**

**Name:** Paul Nikolich

**Email Address:** [p.nikolich@ieee.org](mailto:p.nikolich@ieee.org)

**Phone:** 857.205.0050

**Contact Information for Standards Representative**

**Name:** James Gilb

**Email Address:** [gilb@ieee.org](mailto:gilb@ieee.org)

**Phone:** 858-229-4822

---

**4.1 Type of Ballot:** Individual

**4.2 Expected Date of submission of draft to the IEEE-SA for Initial Sponsor Ballot:** 02/2015

**4.3 Projected Completion Date for Submittal to RevCom:** 10/2015

---

**5.1 Approximate number of people expected to be actively involved in the development of this project:**

**5.2.a. Scope of the complete standard:** This standard specifies Media Access Control (MAC) Bridges that interconnect individual Local Area Networks (LANs), each supporting the IEEE 802 MAC service using a different or identical media access control method, to provide Bridged Local Area Networks and Virtual LANs (VLANs).

**5.2.b. Scope of the project:** This standard specifies the protocols, procedures, and management objects for an Application Virtual Local Area Network (VLAN) identifier (ID) Type, Length, Value (TLV) within the Data Center Bridging eXchange (DCBX) protocol defined in IEEE Std 802.1Qaz.

Minor additions (e.g. adding a value for the Differentiated Services Code Point to the Sel field values table) and editorial corrections to the Application VLAN TLV.

**Changes in scope of the project:** This standard specifies the protocols, procedures, and management objects for an Application Virtual Local Area Network (VLAN) identifier (ID) Type, Length, Value (TLV) within the Data Center Bridging eXchange (DCBX) protocol defined in IEEE Std 802.1Qaz. **Minor additions (e.g. adding a value for the Differentiated Services Code Point to the Sel field values table) and editorial corrections to the Application VLAN TLV.**

**5.3 Is the completion of this standard dependent upon the completion of another standard:** No

**5.4 Purpose:** MAC Bridges, as specified by this standard, allow the compatible interconnection of information technology equipment attached to separate individual LANs.

**5.5 Need for the Project:** For networks that already make use of DCBX, an Application VLAN ID TLV will simplify the management of the end station by allowing the VLAN ID for the application to be communicated via DCBX rather than requiring manual configuration. Converged network deployments where multiple networks such as LAN/Storage/High Performance Computing (HPC) are operated over the same physical infrastructure make use of the DCBX protocol to provision services such as Priority-based Flow Control (PFC), Enhanced Transmission Selection (ETS), and Application Priority. In these deployments, it is highly desirable to be able to provision the VLAN ID for an application via DCBX, instead of requiring manual provisioning.

**5.6 Stakeholders for the Standard:** Developers, providers, and users of networking equipment and services, including networking IC developers, switch and NIC vendors, networking service providers, and end users.

---

### **Intellectual Property**

**6.1.a. Is the Sponsor aware of any copyright permissions needed for this project?:** No

**6.1.b. Is the Sponsor aware of possible registration activity related to this project?:** No

---

**7.1 Are there other standards or projects with a similar scope?:** No

### **7.2 Joint Development**

**Is it the intent to develop this document jointly with another organization?:** No

---

**8.1 Additional Explanatory Notes (Item Number and Explanation):** 5.2b - Title of 802.1Qaz is IEEE Standard for Local and Metropolitan Area Networks--Media Access Control (MAC) Bridges and Virtual Bridged Local Area Networks--Amendment 18: Enhanced Transmission Selection for Bandwidth Sharing Between Traffic Classes
