802.1Qcc: Protocols by Model

Rodney Cummings
National Instruments
1. Signaling Protocol that is Actually Published (SPAP)
   • For .1Qcc work today, this is MRP (i.e. MSRPv0 and v1)
   • When IS-IS-like protocol is ready, use per port (i.e. MSRPv2)

2. Published YANG-based remote management protocol
   • Baseline in .1BA-like standard; Applications can use others

3. For seamless redundancy path computation using BLCE
