

# P802.1CBcv

Amendment: Information Model, YANG Data Model and Management Information Base Module

Resolution of Comments on Project Authorization Request (PAR) and Criteria for Standards Development (CSD)

2018-03-07

# 802.11 Comment on PAR 5.2.b

## › Comment:

**PAR 5.2.b PAR should be in present tense and not promise future action. Suggest delete last sentence to “Additionally, this amendment will address errors or omissions to existing features.”**

## › Response:

**Accept**

– 5.2.b updated to:

“Additionally, this amendment addresses errors or omissions to existing features.”

# 802.3 Comment on CSD 1.2.1.b

## › Comment:

1.2.1.b — Though numbers are significant, they are rather dated, isn't more current data available to justify market sizes? In the second paragraph, a 2014 projection is especially awkward as that was a projection from 8 years ago for a year where actual data is more than 3 years old.

# 802.3 Comment on CSD 1.2.1.b

## › Response:

### Accept in principle

- The reason for the dated numbers is that the base documents BMPs have been inserted for reference. However, based on your comment we decided to change the item as follows:

1.2.1.b updated to:

“Network equipment and integrated circuit vendors for Industrial Automation, In-vehicle networking, Professional Audio-Video (AV), Data Center and other systems requiring the base standard will participate in the development of the project.”

# 802.3 Comment on CSD 1.2.1.b

## › Comment:

1.2.1.b — Though 802.3 folk will eventually understand FE:GE:10+GE, the acronyms without expansion/definition are likely to cause other folk problems (Fast Ethernet is especially archaic as it isn't directly a speed of operation). Replace with precise speed descriptions.

## › Response:

Accept in principle

- As 1.2.1.b has been changed due to the second comment submitted, these acronyms are no longer present in the text.
