

# **Editor's Report 60802 Draft 1.1**

**July, 2019  
IEEE802 Plenary, Vienna**

**Jordon Woods, Analog Devices**

# Draft Status

- The editor is currently working on draft 1.1
  - Focus has been on the “restructuring” of the document in accordance to the agreed upon principles.
    - IEEE802.3 Selections (now Common MAC and PHY Requirements; Common MAC and PHY Options).
    - IEEE802.1Q-2018 Selections roughly 75% complete (Now Bridge Requirements and Options).
    - No work has begun on conformance classes.
    - No work has begun on IEEE802.1Q Amendments.
- Clause 4.1.1, Control loop operation (now clause 6.1.1) has been incorporated in the draft.
- Initial “Management Model” text has been drafted and will be reviewed at this meeting.

# Additional Contributions Expected

- Traffic Types.
- Quantities/Parameters/Data Sheet.
- Inter-domain communications
- Synchronization.
- Security.
- Refined management model based upon discussions at this meeting.

# Next Steps

- Complete the restructuring
- Incorporate other expected contributions as they become available.
- Add conformance classes (at least ccA and ccB).
- Incorporate a host of editorial comments.
- Review draft to ensure all comments are addressed
- Ambition: Present the draft at the interim meeting in Edinburgh.

**Thank you**
