# YANG Status

- 60802 YANG is available in the draft, working on creating the module files for validation.
- Validation (pyang and yanglint) is completed before uploading to GitHub (YANG Catalog GitHub repository):  
<https://github.com/YangModels/yang>
- Published modules (AEdk and Qcz are the next two) also need to be uploaded here: <https://1.ieee802.org/yang-modules/>

# YANG for Link Aggregation

# REVc Information

- REVc Agenda: <https://1.ieee802.org/2023-09-interim-maintenance-agenda/#Wednesday Sep 13 meeting 800-1000 ET>
- OID and URN clauses will need to be considered in YANGsters when work is done.
- Ensure <https://standards.ieee.org/wp-content/uploads/import/documents/tutorials/ieeeurn.pdf> is updated appropriately

# ETSI Plugtest for Microwave

- <https://www.etsi.org/events/2086-mwt-plugtests-4>
- The was a “plugtest” that included published IEEE 802.1 YANG modules
- The results of the “plugtest” found some issues with the modules
- The yang is being discussed here: <https://github.com/samans/draft-ybam-rfc8561bis/issues/19>
- Some of this might be answered by the new bridge modules (from the Qcw work), but the suggesting is for YANGsters to review and consider the comments
