Wireless LANs**

Report of Ballot on IEEE P802.11 D1

Date: February 8, 1995

Author: Vic Hayes, Chair IEEE P802.11
AT&T WCND
Zadelstede 1-10
Phone: +31 3402 97528
Fax: +31 3402 97555
e-Mail: vic.hayes@utrecht.attgis.com

The statement:

“I approve the IEEE P802.11 proposed draft standard P802.11/D1 to be forwarded for sponsor ballot”

was defeated with the following result:

17, 66, 11

Member type	Approve	Do not approve	Abstain	Grand Total
Aspirant members	1	0	0	1
ExCom members	1	0	1	2
Voting members	17	66	11	94
Nearly voting members	0	1	0	1
Grand Total	19	67	12	98

The ballot is valid because 84 % of the voting members (we have 111 voting members) returned their ballot. (50 % is required)

One abstention was filled in by myself, because I was informed that the voter traveled to Japan and had not been contacted since the earthquake. All other abstentions showed a lack of expertise indication.

I have made the best effort to consolidate the comments into a set of documents with document numbers consisting of the number of this document and an post-fix indicating the section number involved (**1-10, a, b, c** for sections 10, 11 and 12 respectively), a **t** for tabel of contents and indices, an **x** for annexes and appendices and a **g** for general and miscellaneous comments; that is comments that were not addressed to a specific object.

The remainder of this documentshowes the vote per individual.

In the column ballot, I have marked a **y** for “approve”, an **n** for “do not approve” and an **a** for abstain. In the column comment I have indicated a **c** if comments were submitted, **expertise** if the abstention was due to lack of expertise, **time** if the abstention was due to lack of time and **earthquake** for the special case.

Please let me know if your comments were not correctly represented in this document.

Dave Bagby submitted an annotated file. On my request he had placed the contents into the requested tableformat with a qualification that his annotated file is thevalid return. I will only make the annotated file available through the file on the diskette and on the FTP servers. I will thus exclude a paper copy.
