Subject: Questionnaire on Versions of files and mailing
Date: Wednesday, April 26, 1995 10:23AM

@80211-list
To the members of IEEE P802.11
From Vic Hayes, Chair

In view of the problems we had with the files in Version 2.0 of Word for Windows, I would like to get a feel of how many people would have difficulty if we would change now to the current versions of software.

I would also like to know if we could further modernise the distribution of documentation.

To that end I am now holding a "straw poll" on the questions below. After a discussion at the interim meeting, I would then like to hold a letter ballot from the Salt Lake City meeting.

Version of files.

Distribution of Word for Windows files in version 6.0.

only 1 X in the first Column please

- I do agree, I work in that version
- I do agree, I will buy the new version
- I do agree, I can view that version
- I do agree, I can convert to/from that version
- I do NOT agree for the following reason

Distribution of Powerpoint files in version 4.0

only 1 X in the first Column please

- I do agree, I work in that version
- I do agree, I will buy the new version
- I do agree, I can view that version
- I do agree, I can convert to/from that version
- I do agree, provided an alternative is sent in RTF
- I do NOT agree for the following reason

Distribution of material by e-mail AND on FTPservers only
this would mean NOBODY would receive mailed material.

only 1 X in the first Column please

- I do agree
- I do NOT agree for the following reason

For the reflector

We would maintain just a single mailing list for all messages

Select one by an X in column one

- I do agree that we can remove the bulk list
- I do NOT agree with receiving files larger than 4 pages
for the following reason:

Looking forward to receive your return back quickly.

Vic
