Approval from IEEE-USA for Filing September 1999 letters

Date: September 15, 1999

From: Ned Sauthoff [SMTP:n.sauthoff@ieee.org]
Sent: Wednesday, September 15, 1999 13:26
To: Hayes, Vic (Vic)
Cc: d.rudolph@ieee.org
Subject: Re: IEEE C63 involvement
Importance: High

Vic,

From the IEEE-USA perspective, we see no reason to object to your filing of the material with the FCC if you have received approvals within your IEEE entity. Please send a paper copy of the submission to Deborah Rudolph for the records.

I do not feel qualified to comment on the matter of C63's/EMC's roles and the procedures within Standards.

Ned

>Ned,

>

>Please advise whether we need C63's approval in addition to yours for a
>filing at FCC.

>We received the attached reaction from the Chairman of HomeRF WG, Ben Manny
>of Intel.

>

>In his first, oral, reaction he indicated that the Chair of C63 felt he had
>to be involved in the filing of our first ex-parte letter in response to
>NPRM ET Docket 99-231 you cleared in July 1999. When I indicated that we
>were not bound by C63, but just by your group, he changed his position in
>that he asked us to request C63 to do a study and file that before the FCC
>will make their Report and Order.

>

>I will go along those lines of requesting a study, but would like to receive
>your advice as to whether we indeed are in fact bound to getting approval by
>C63. In my opinion, C63 has a standards making function, not a watching
>function.

>

>I have attached the scope of C63 for your information.

>

>Looking forward to receive your response by Thursday, September 16, noon. We
>are in session this week and I need to rule either this afternoon or Friday
>morning.

>

>Thanks.

 >Steve,
 >Per your phone call, I suggested to Vic that the IEEE EMC group would be
 >interested in assessing the interference impacts of the proposed FCC
 >Wideband FH NPRM. This study would be based on the NPRM, the papers
 >presented to the 802.11 committee and the comments filed with the FCC. Vic
 >gave me his card, and requested I send you email so that both of you could
 >discuss this further. Vic works for Lucent and is based in the Netherlands.
 >His phone number is +31 (0) 30 609 7528. Vic is aware I will be working
 >with a Stu Kerry, a voting member, to present a motion to the 802.11 group
 >requesting this study and summary report, which I will be doing on
 >Wednesday, 9/15. He asked my why you called and I mentioned that you had
 >seen the FCC letter since you help Siemens track FCC activity and were a
 >little surprised that the EMC group did not have a change to participate in
 >this study since interference/compatibility is what the EMC deals with. I
 >also mention you called me because Siemens is a member of the HomeRF working
 >group and were aware of this proposed rule change.

>
 >Vic,
 >Steve is with Siemens and is based in Austin Texas. His phone number is 512
 >657 6147.
