Project	**IEEE 802.16 Broadband Wireless Access Working Group <http://ieee802.org/16>**
Title	**Proposed text and ASN.1 code to support PKMV1 and PKMV2**
Date Submitted	**2007-01-11**
Source(s)	Joey Chou Intel Corporation [mailto:joey.chou@intel.com]
Re:	
Abstract	This contribution proposes the text and ASN.1 code in wmanIf2Mib to support PKMV1 and PKMV2.
Purpose	Adoption
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.
Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures (Version 1.0) <http://ieee802.org/16/ipr/patents/policy.html>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, if there is technical justification in the opinion of the standards-developing committee and provided the IEEE receives assurance from the patent holder that it will license applicants under reasonable terms and conditions for the purpose of implementing the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <mailto:r.b.marks@ieee.org> as early as possible, in written or electronic form, of any patents (granted or under application) that may cover technology that is under consideration by or has been approved by IEEE 802.16. The Chair will disclose this notification via the IEEE 802.16 web site <http://ieee802.org/16/ipr/patents/notices>.

Table of Content

1

1. Introduction

This contribution proposes the text and ASN.1 code in wmanIf2Mib to support PKMV1 and PKMV2.

2. NRM IRP SNMP Solution Set change Proposal

2.1 wmanIf2BsPkmObjects Changes

13.1.3.1 wmanIf2BsObjects

[Change Subclause 13.1.3.1.3 as the following:]

13.1.3.1.3 wmanIf2BsPkmObjects

Figure 8 shows the structure of wmanIf2BsPkmObjects subtree that contains BS managed objects related to the MAC privacy management entity.

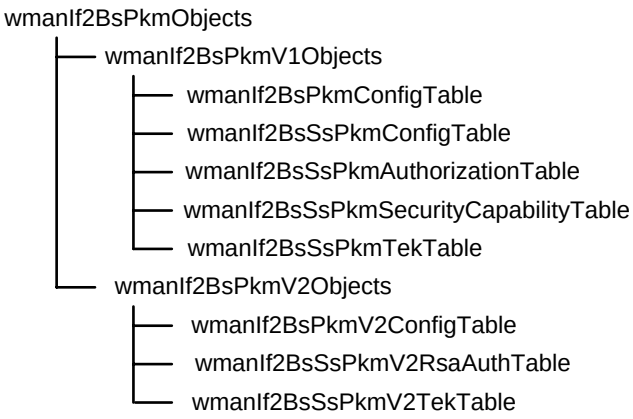

Figure 8— wmanIf2BsPkmObjects structure

13.1.3.1.3.1 wmanIf2BsPkmV1Objects

13.1.3.1.3.1.1 wmanIf2BsPkmConfigTable

wmanIf2BsPkmConfigTable contains the configuration of the PKM attributes that are needed to PKM operation.

13.1.3.1.3.1.2 wmanIf2BsSsPkmConfigTable

wmanIf2BsSsPkmConfigTable contains the configuration of the PKM attributes on per SS basis.

13.1.3.1.3.1.3 wmanIf2BsSsPkmAuthorizationTable

wmanIf2BsSsPkmAuthorizationTable contains information related to SS's authorization process.

13.1.3.1.3.1.4 wmanIf2BsSsPkmSecurityCapabilityTable

wmanIf2BsSsPkmSecurityCapabilityTable contains the SS's Security Capabilities that are conveyed by the Auth Request message. It contains the list of the cryptographic suite(s) an SS supports.

13.1.3.1.3.1.5 wmanIf2BsSsPkmTekTable

wmanIf2BsSsPkmTekTable contains the TEK attributes that are associated with each SAID.

13.1.3.1.3.2 wmanIf2BsPkmV2Objects

13.1.3.1.3.2.1 wmanIf2BsPkmV2ConfigTable

wmanIf2BsPkmV2ConfigTable contains the configuration of the PKM attributes that are needed to PKM operation.

13.1.3.1.3.2.2 wmanIf2BsSsPkmV2RsaAuthTable

wmanIf2BsSsPkmV2RsaAuthTable contains information related to PKMV2 RSA based authorization process.

13.1.3.1.3.2.3 wmanIf2BsSsPkmV2TekTable

wmanIf2BsSsPkmV2TekTable contains the TEK attributes that are associated with each SAID.

2.2 wmanIf2SsPkmObjects Changes

13.1.3.1 wmanIf2BsObjects

[Change Subclause 13.1.3.2.2 as the following:]

13.1.3.2.2 wmanIf2SsPkmObjects

Figure 12 shows the structure of wmanIf2SsPkmObjects subtree that contains subscriber station manageable objects related to the privacy management entity.

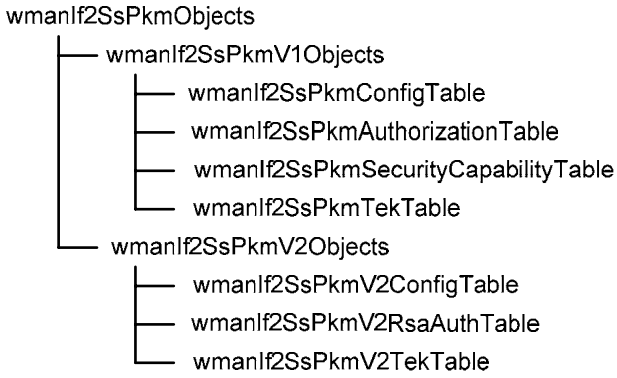

Figure 12— wmanIf2SsPkmObjects structure

13.1.3.2.2.1 wmanIf2BsPkmV1Objects

13.1.3.2.2.1.1 wmanIf2SsPkmConfigTable

wmanIf2SsPkmConfigTable provides the configuration of the PKM attributes that are needed to PKM operation.

13.1.3.2.2.1.2 wmanIf2SsPkmAuthorizationTable

wmanIf2SsPkmAuthorizationTable contains information that are related to SS's authorization proces.

13.1.3.2.2.1.3 wmanIf2SsPkmSecurityCapabilityTable

wmanIf2SsPkmSecurityCapabilityTable contains the SS's Security Capabilities that are conveyed by the Auth Request message. It contains the list of the cryptographic suite(s) an SS supports.

13.1.3.2.2.1.4 wmanIf2SsPkmTekTable

wmanIf2SsPkmTekTable contains the TEK attributes that are associated with each SAID.

13.1.3.2.2.2 wmanIf2BsPkmV2Objects

13.1.3.2.2.2.1 wmanIf2SsPkmV2ConfigTable

wmanIf2SsPkmV2ConfigTable contains the configuration of the PKM attributes that are needed to PKM operation.

13.1.3.2.2.2.2 wmanIf2SsPkmV2RsaAuthTable

wmanIf2SsPkmV2RsaAuthTable contains information related to PKMV2 RSA based authorization process.

13.1.3.2.2.2.3 wmanIf2SsPkmV2TekTable

wmanIf2SsPkmV2TekTable contains the TEK attributes that are associated with each SAID.

2.3 wmanIf2BsPkmObjects ASN.1 Code Change

13.2 ASN.1 Definitions of MIB Modules

13.2.3 wmanIf2Mib

[Change wmanIf2BsPkmObjects to the following in WMAN-IF2-MIB:]

```
WmanIf2AuthFailureType ::= TEXTUAL-CONVENTION
        STATUS      current
        DESCRIPTION
            "The type of authorization failure leading to Auth Reject
             message.
               1 - no failure
               2 - unauthorized SS
               3 - unauthorized SAID
               4 - the BS does not have the CA certificate belonging
                   to the issuer of an SS certificate
               5 - SS certificate has an invalid signature
               6 - ASN.1 parsing failure during verification of SS
                   certificate
               7 - SS certificate is on the 'hot list'
               8 - inconsistencies between certificate data and data
                   in accompanying PKM attributes
               9 - SS and BS have incompatible security capabilities"
        REFERENCE
            "Subclause 11.9.10 in IEEE Std 802.16-2004"
        SYNTAX      INTEGER {noFailure(1),
                             unauthorizedSs(2),

        SYNTAX      WmanIf2AuthFailureType
        MAX-ACCESS  read-only
        STATUS      current
        DESCRIPTION
            "BS returs PKMV2 RSA-Rejects message if an authorization
             failure is detected.

             Failure type umknownManufactur(4)- ssBsIncompatibleSc(9)are
             considered permanent authorization failure, since any
             attempts of reauthorization would continue to result in
             Authorization Rejects. Details about the cause of a
             Permanent Authorization Failure may be reported to the SS
             in an optional Display-String attribute that may accompany
             the Error-Code attribute in Authorization Reject messages.

             Note that the BS may log the Display-String attribute and
             Authorization failures in wmanIfDevMib, and generate a trap
              to an SNMP manager."
