| Abstract                            | To record meeting minutes                                                  |
| Purpose                             | This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein. |
| Release                             | The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE’s name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE’s sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16. |
| Patent Policy and Procedures        | The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures <http://ieee802.org/16/ipr/patents/policy.html>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <mailto:chair@wirelessman.org> as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site <http://ieee802.org/16/ipr/patents/notices>. |

The Chair identified that, as part of the 802.16i process of identifying objects to be put into either the ‘common’ portion of the SMIPv2 tree or the ‘mobile’ portion of the SMIPv2 tree, the Netman TG was in fact making selection and distinction, on behalf of the WG, of mobile features and objects. The Chair recommended bringing this to the attention of the WG at the WG Closing Plenary with request that the WG endorse this process or make other accommodation, perhaps by establishing a committee to make such determination.

Completed TG Comment Resolution of Call for Comments 802.16i-06/008 on Baseline Task Group Document 802.16i-06/001r3 for 802.16i. 10 Comments are in 802.16i-06/009r1.

From Session 44 Minutes:
‘Mike Geipel requested from the Chair and was granted a few minutes to discuss 802.16i matter of making text format of MIB available along with any new iteration of the Draft, and the final version to accompany the published standard. Also concern regarding obsolescence of MIB documents with discontinued MIB documents continuing to be available even when the underlying standards has been removed from circulation. The TG Chair will investigate this matter and report back to the group at Session #45.’

Chair’s report on this matter:
All three MIBs of the final 16f published standard are now available for free on the Get IEEE website. 802.16 will ensure that they remain available on the 802.16 website even if discontinued on the Get IEEE website.

Erik Colban uploaded Liaison contribution L802.16-06/025 detailing correspondence with IANA on the OID matter.
