Base Document: Initial TGM Work Plan (802.16m-07/001)

Purpose: To assist updating TGM work plan and schedule for the development of 802.16m standard
with consideration of IMT-Advanced development timeline

Notice:

This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.

Release:

The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.

IEEE 802.16 Patent Policy:

The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures <<http://ieee802.org/16/ipr/patents/policy.html>>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <<mailto:chair@wirelessman.org>> as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site <<http://ieee802.org/16/ipr/patents/notices>>.

Comments on C802.16m-07/110

- We agree with the suggestion of C802.16m-07/110 to add the SDD into the schedule.
- C802.16m-07/110 does not fully reflect updates to the ITU-R timeline.
 - Initial Work Plan presumed IMT-Advanced plan of Slide #3 below, with proposals due in June 2008.
 - Detailed IMT-Advanced timeline update on Slide #4 below shows that initial IMT-Advanced proposal submission starts on 08-Oct-08.
- IMT-Advanced schedule and IEEE 802.16m development schedule should be updated accordingly.
- IMT-Advanced requirements will be available only after January 08.
- SDD should be prepared with more care since we have more time.

IEEE 16m Schedule updates (proposed)

- Requirements Document
 - To meet IMT-Advanced requirement, the document update should remain open to the completion of IMT.TECH (Jan./2008, #23)
- Evaluation Methodology Document
 - To correctly evaluate 16m system, the document update should remain open to the completion of IMT.EVAL (Jan./2008, #23 ~ June/2008, #24)
- System Description Document
 - The description shall be based on IMT.TECH and IMT.EVAL, so its update shall be continued until the completion of IMT.EVAL.
- IMT-Advanced proposal document
 - Its completion shall be timed to the initial proposal submission of IMT-Advanced technology (Oct./2008, #25)
 - Its initiation shall be based on the ITU WP8F meeting result (Jan./2008, #23)
- 16m Amendment Draft
 - Its initiation shall be based on IMT.EVAL and IMT.TECH schedule (Jan./2008, #23 ~ June/2008, #24)
