Call for Comments and Contributions on Project 802.16m Requirements:
IEEE 802.16 Advanced Air Interface

Deadline: 30 April 2007 AOE

At the IEEE 802.16 Session #48 in March 2007, Task Group m reviewed a draft Requirements document. Portions of the document were accepted by the Task Group <http://www.ieee802.org/16/tgm/docs/80216m-07_002r1.pdf> . The portions of the document that have not yet been accepted are designated with square brackets.

Call for Comments and Contributions

The Task Group now solicits specific Comments and Contributions, on **<u>ONLY</u>** the bracketed text in the draft Requirements document, for discussion and potential adoption during Session #49 in Portland, OR, USA. In particular, comments or contributions that attempt to consolidate or harmonize the bracketed text are highly desirable. It is anticipated that, at the end of Session #49, a document without bracketed text will have been completed and will be reissued for additional comment on its complete text content.

Submit your comments (with or without associated contributions) by the **deadline of 30 April 2007 AOE** following the instructions at <http://dot16.org/Commentary> and <http://ieee802.org/16/submit.html>.

Comments should refer to the "Ballot ID" as "tgmreq" and the "Document under Review" as "IEEE 802.16m-07/002r1".

Contributions should be included only if the Proposed Requirement text is so substantial as to require the contribution format for appropriate presentation. Any contribution shall be referenced by an appropriate comment. Make use of the "TGm" upload directory at <http://tgm.wirelessman.org> to post both comments and contributions.

This is not a ballot, so please do not vote to 'Approve' or 'Disapprove' the document. This is a Call for Comments to improve the document and prepare it for eventual adoption by the Task Group.
