

802.17c Proposed Schedule

January 15-17, 2007
London, England

Mike Takefman

802.17c

- Information Technology - Telecommunications and information exchange between systems - Local and metropolitan area networks - Specific requirements – Part 17 - Resilient Packet Ring Access Method & Physical Layer Specifications – Amendment 2 – Protected Inter-Ring Connection

802.17c Scope

- This project amends 802.17b-2007 adding one or more new clauses defining optional extensions to support increased spatial reuse on the media. 802.17-2004 allows spatial reuse for ring local unicast transmissions, this amendment adds support for spatial reuse of other frame transmissions (e.g. remote bridging as seen in 802.1 D/Q). Changes to existing clauses of 802.17-2004 are permitted if required to support the new clauses.

802.17c Scope

- This project amends 802.17b-2007 adding one or more new clauses defining ...

802.17c History

- Study Group formed in November 2006 and will requested a PAR in March or July 2007
- Technical presentations since November 2006
- Requirements document started in January 2007
- Schedule agreed to in March 2007

Proposed Schedule

- March 2007
 - Requirements selected
- May 2007
 - Technical proposals continue
- July 2007
 - PAR Requested, Technical proposals continue
- September 2007
 - Technical decisions, Draft creation
- November 2007
 - Draft Refinement – WG Ballot start
- January 2008
 - CR D1.0 / D1.1 Start
- July 2008 Sponsor Ballot start
- September
 - CR D2.0
- November 2008
 - Request Pre-authorization to RevCom
- February 2009
 - Approval
