

IEEE 802.17 Maintenance Request 0012

MR number 0012 Classification Technical Date received 3/11/2005 **Reserved for official 802.17 use**

Standard 802.17-2004 Page 311 Subclause 11.4.2.1 Figure _____ Table _____

Surname Lemon Given Name John

Perceived Problem [If more space is needed, please provide an additional file, preferably as plain text.]

The values encoded into the station bandwidth ATT should not be weight normalized, and should be converted to timescale used by fairness.

Proposed Remedy [If more space is needed, please provide an additional file, preferably as plain text.]

In 11.4.2.1 and 11.4.2.2, change ", normalized as per 10.1.3.8." to ". The bandwidth is reported in units of bytes per *ageCoef agingIntervals*, and normalized by dividing by the product of *ageCoef* and *rateCoef* to provide the numbers in the units and scale used by the fairness algorithm (see 10.1.3.8).".

Rationale For Remedy [If more space is needed, please provide an additional file, preferably as plain text.]

The description is incomplete and at least misleading, if not completely incorrect.

Remedy's Effect On Existing Equipment [If more space is needed, provide an additional file, preferably as plain text.]

Correcting the setting of this field could mislead existing equipment that may have implemented an incorrect assumption of what this field means.
