IEEE 802.17 Maintenance Request 0122

| **MR number** | 0122 | **Classification** | Technical | **Date received** | 9/15/2006 | **Reserved for official 802.17 use** |

Standard 802.17-2004   **Page** 127   **Subclause** 7.6.3.5.4   **Figure** _____   **Table** 7.19

Surname Juźwiak   **Given Name** Piotr

Perceived Problem   [If more space is needed, please provide an additional file, preferably as plain text.]

The keepaliveTime is an integer variable in some places („Table 7.19—ReceiveFromEdge state table" & „Table 7.22-ReceiveStrip state table") but it is defined as an array in „11.2.3 Common state machine variables".

Proposed Remedy   [If more space is needed, please provide an additional file, preferably as plain text.]

I suggest changing notation in tables 7.19 & 7.22 from:

keepaliveTime = currentTime;

to (for example):

keepaliveTime[myRi] = currentTime;

where myRi is a ringlet number.

Rationale For Remedy   [If more space is needed, please provide an additional file, preferably as plain text.]

It's a small change but it makes the code of state machines more clear.

Remedy's Effect On Existing Equipment   [If more space is needed, provide an additional file, preferably as plain text.]

I don't expect any.

When you have completed this form, please mail it to STDS-802-17-MR   @   listserv.ieee.org.
