IEEE 802.17 Maintenance Request 0127

MR number	0127	**Classification**	Technical	**Date received**	9/15/2006	**Reserved for official 802.17 use**

Standard 802.17-2004   **Page** 355   **Subclause** 11.6.8.4   **Figure** _____   **Table** 11.18

Surname Juźwiak   **Given Name** Piotr

Perceived Problem   [If more space is needed, please provide an additional file, preferably as plain text.]

Inconsistent notation "frame.seq" in ReceiveTpFrame machine specification.

Proposed Remedy   [If more space is needed, please provide an additional file, preferably as plain text.]

Condition in row 8 of table 11.18 should be changed from:
"topoEntry[ri][hops].sequenceNumber == frame.seq"
to:
"topoEntry[ri][hops].sequenceNumber == frame.seqnum"

Rationale For Remedy   [If more space is needed, please provide an additional file, preferably as plain text.]

Definition of TP frame field prefs (11.3.1.4) calls these bits "seqnum" not a "seq" .

Remedy's Effect On Existing Equipment   [If more space is needed, provide an additional file, preferably as plain text.]

Rather no impact – error must have been found during implementation process.
