EC election and confirmation process

Current Working Group and Technical Advisory Group Chairs should announce to their Groups that normal two-year elections are being held per the 802 LMSC Policies and Procedures, inform the Group if they wish to be considered as a candidate for re-election and solicit new candidates for the positions of Chair and Vice-Chair (at a minimum). The Group shall hold a formal election. The winners of the elections for Chair and Vice Chair(s) shall be presented to the EC (along with the numerical results) at the closing EC meeting upon which those elected are considered for confirmation by the EC. Newly elected/confirmed occupants of positions will formally take responsibility at the end of the March plenary session.

Each Group shall also elect a Vice Chair or Vice Chair(s). A Group may have more than one Vice Chair if warranted and to develop leadership candidates.

If there are additional candidates for IEEE 802 LMSC Chair they should notify the recording secretary, James Gilb, by Monday morning, 15MAR2010, in order that the selection process proceeds in a smooth and open manner.

Responsibilities of the IEEE 802 LMSC chair and appointed positions are described below.

The confirmation of elected WG/TAG Chair and Vice-Chair will take place at the closing EC meeting as the first item under "Motions, Internal"(MI). Chairs, please be prepared to report the **numerical results** of the elections in your WG/TAG to the EC. If new WG or TAG Chairs or Vice-Chairs are confirmed by the EC, they will take office at the end of the Plenary session.

The election of LMSC Chair will then take place followed by the confirmation of appointed officers. If a new IEEE 802 Chair is elected, I propose that we delay the confirmation of the appointed members until the following session in order to provide for adequate review by the EC members.

General Notes:

There are tremendous variations in the level of time/resources needed to support LMSC. There is a somewhat constant level of 80 hours per month (average) to do the various items identified above. There are also actions that demand attention whenever they occur, ranging from big issues that take 100% of one's time because of the magnitude of the issue, or the volume of communications. Unfortunately, the latter events have become more frequent and they can consume full-time effort (or more) from five to twenty five days.

There is another level of activity that has tremendous advantages for LMSC at the same time it consumes substantial resources. From time-to-time the opportunity arises for LMSC spokespersons to speak at conference and seminars. One could make this a full-time job, or ignore it. Experience indicates that good/valuable opportunities arise about once a year to make a major presentation at some national or international meeting. It is my opinion that EC

members should do more of this on a coordinated basis to spread the word, build further interest, gain added commitments to LMSC programs.

Occasionally and emergency situation develops, and the VC is suddenly required to conduct LMSC business for an extended period of time.
