Chairman of IEEE Study Group
Mr. Brad Booth
10GBASE-T Study Group Contact
bradley.booth@intel.com

Dear Brad:

In response to your call for papers regarding 10 Gigabit Ethernet over copper, I would like to call your attention to the work being performed within Subcommittee 46C of the IEC.

This subcommittee has recently published two specifications covering symmetrical pair cables with transmission performance characterized to 600 MHz. These two documents are IEC 61156-5 and 61156-6. In addition, we are finalizing a companion specification for symmetrical pair cables with transmission performance characterized to 1200 MHz. A draft of this standard is attached for your information.

IEC SC 46C wishes to propose the establishment of a liaison, by correspondence, between our two groups so that the latest activities can be shared. Specifically, we would like to nominate Mr. Jacob Ben Ary as our contact. Mr. Ben Ary's coordinates are:

Jacob Ben Ary
TELDOR Wires & Cables
IEC-46C-W7 member
Project leader of IEC 61156-7 (1 200 MHz cable)
ben_ary@aquanet.co.il
jbenary@teldor.com

We believe that such a liaison would be mutually beneficial to both parties and to the marketplace.

Please contact me regarding your opinion on this request.

Very truly your,

Siegfried Brüggendieck
Chairman SC 46C
