Re: Liaison letter dated December 27, 2002

Dear Siegfried:

Thank you for your interest in the IEEE 802.3 10GBASE-T Study Group. IEEE 802.3 Study Groups do not establish formal liaisons, only our parent organization (802.3) can establish formal liaisons.

IEEE 802.3 has formal liaisons with ISO/IEC SC 25 and TIA TR 42. IEEE 802.3 practice is to only reference building cabling standards. As such, the 10GBASE-T Study Group feels that the current liaison relationships with IEEE 802.3 are suitable for our work.

Thank you again for your interest and request.

Sincerely,

Brad Booth
Chair, IEEE 802.3 10GBASE-T Study Group

Cc: Bob Grow, Chair, IEEE 802.3
