

50G and NGOATH Study Groups Ad Hoc Report

Kent Lusted, Intel
Ad Hoc Chair

Report

- 5 ad hoc calls since Dallas Plenary
 - December 2, 9 & 16, 2015. January 6 & 13, 2016
 - 170+ attendees
 - 12 contributions presented (see next slide)
- Meeting minutes and presentation materials:
<http://www.ieee802.org/3/50G/public/adhoc/archive/index.html>
- Further work: Project Documentation (PAR, CSD, Objectives) and supporting material
- Next meeting: To be announced over the email reflector

Presentations

- “50 Gb/s Ethernet Over a Single Lane and Next Generation 100 Gb/s & 200 Gb/s Ethernet Study Groups: status and work”, Mark Nowell
- “802.3 bs Project Documentation Considerations”, John D’Ambrosia
- “Considerations on objectives for 50G/100G/200G Ethernet SMF PMDs”
- “50G, 100G, 200G work partitioning”, Pete Anslow & Matt Brown
- “Study Group Objectives Discussion”, Mark Nowell (Dec 16, 2015)
- “Study Group Update and Survey Results”, Mark Nowell
- “Proposed changes 802.3bs project documentation” and “IEEE P802.3bs Project Schedule Overview”, John D’Ambrosia
- “Overview of potential impact to IEEE P802.3bs project schedule”, John D’Ambrosia
- “Compatibility Considerations for 50 and 100G”, Rob Stone
- “Study Groups Procedural Progress”, Mark Nowell
- “Considerations on objections to inclusion of 200GbE SMF objectives into IEEE 802.3bs”, Peter Stassar
- “OTN Support for 50GbE, next generation 100GbE, 200GbE”, Steve Trowbridge
