## Presentations/Discussion.

### PMA/PCS Consensus Baseline – review & Q&A – Ramin Shirani(+others) - Aquantia

- Q to Editor: Does not having this information delay writing the draft? A - No
- Question about 50ppm margin? A – s50ppm number stays the same
- Q - Will there be detailed spec? A - Yes, but this presentation is just an overview
- Q - What about delay? A - 5G is 2.5us, 2.5G is 5us - combination of DSP symbol delay and LDPC decode delay

### Other Discussion/Observations:

- Pete C (Intel) will run the meeting next week, Chair is traveling.
- Ramin Shirani (AQ) will provide outline of what he plans to present in future adHocs.
- George Z (Editor) will not be attending next adHoc (6/9/15), so questions related to the draft production probably should be deferred.

Meeting closed – 9:50
