

Meeting Minutes SCC18 Adhoc
November 13, 2018
1PM Bangkok

13:10 Meeting called to order.

The Adhoc Chair reviewed agenda slides, did introductions, covered the IEEE patent policy and participation rules.

13:12 The group reviewed the new comments against TC716. First, the group confirmed the four comments that we generated by the adhoc were properly submitted. Then the group review other comments filed against the same areas as the adhoc generated comments. Markups were made in the document; the file can be found here:

An idea was floated to request the IEEE to trademark PoDL such that it doesn't become an industry standard term similar PoE where it covers non-compliant implementations.

The adhoc chair was instructed to make a motion to request the authority for the adhoc to generate guidance for the ER by Dec 5, 2018.

It was suggested that a presentation be generated by the adhoc to explain the 802.3 concern that caused the submission of comment 38 in the above reference PT716 document. The adhoc will take up this effort.

Other relevant upcoming date/meetings:

PT716 comment resolution meeting: Dec 6, 2018

The next scheduled SCC18 adhoc meeting is Wednesday Nov 28, 2018, 1PM ET.

14:00 Having exhausted the agenda, the meeting was adjourned.
