As noted in IEEE 802.3 NEA BWA2 Teleconference– “Getting real data of networks can be problematic, as it can be interpreted as an indication of the business of the organization providing the data.”

So what data can be found about–

- Users?
- Access Rates?
- Services (Applications) ?

Bandwidth

Interconnection Bandwidth

Following Definition from Equinix–

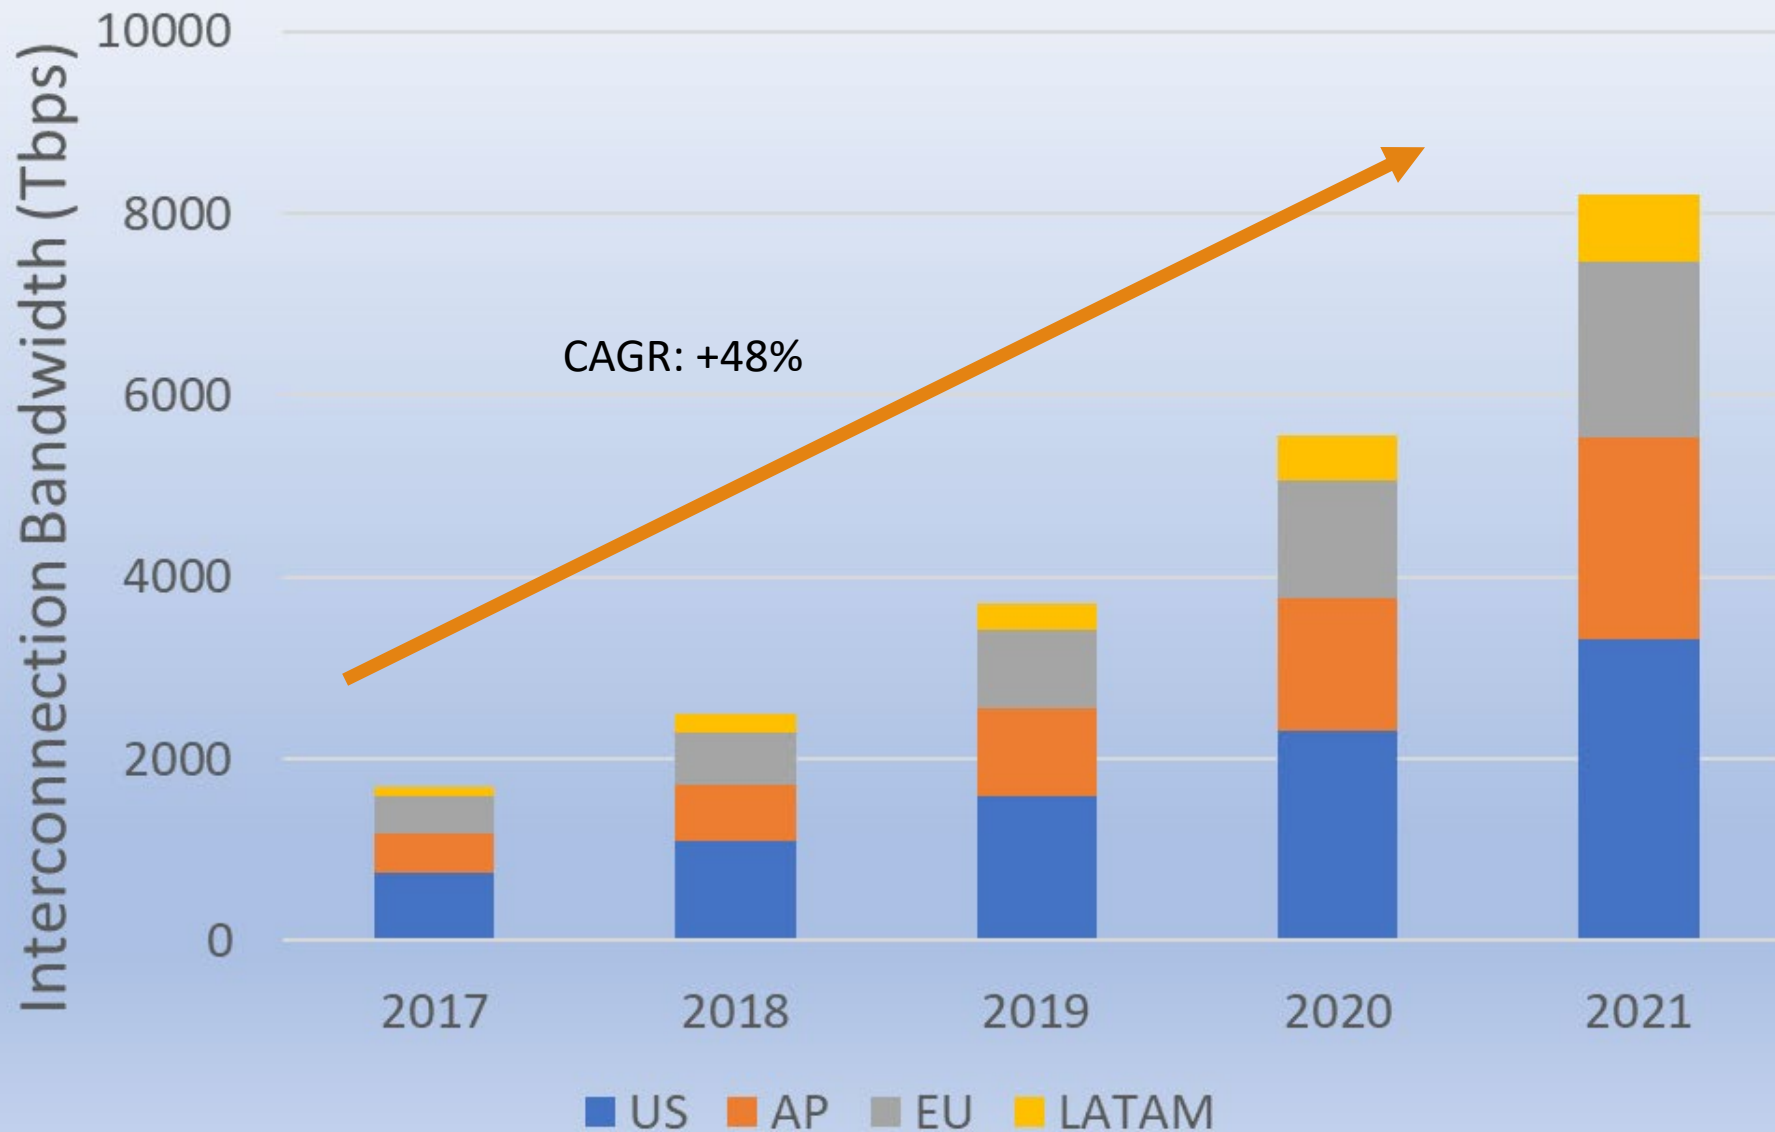

The total capacity provisioned to privately and directly exchange traffic with a diverse set of counterparties (networks, clouds, partners) and providers at distributed IT exchange points inside carrier-neutral colocation data centers.

Global Interconnection Index – annual publication

The Index published 13 sept 2018 forecasts Interconnection bandwidth to grow to 8,200+ Terabits by 2021.

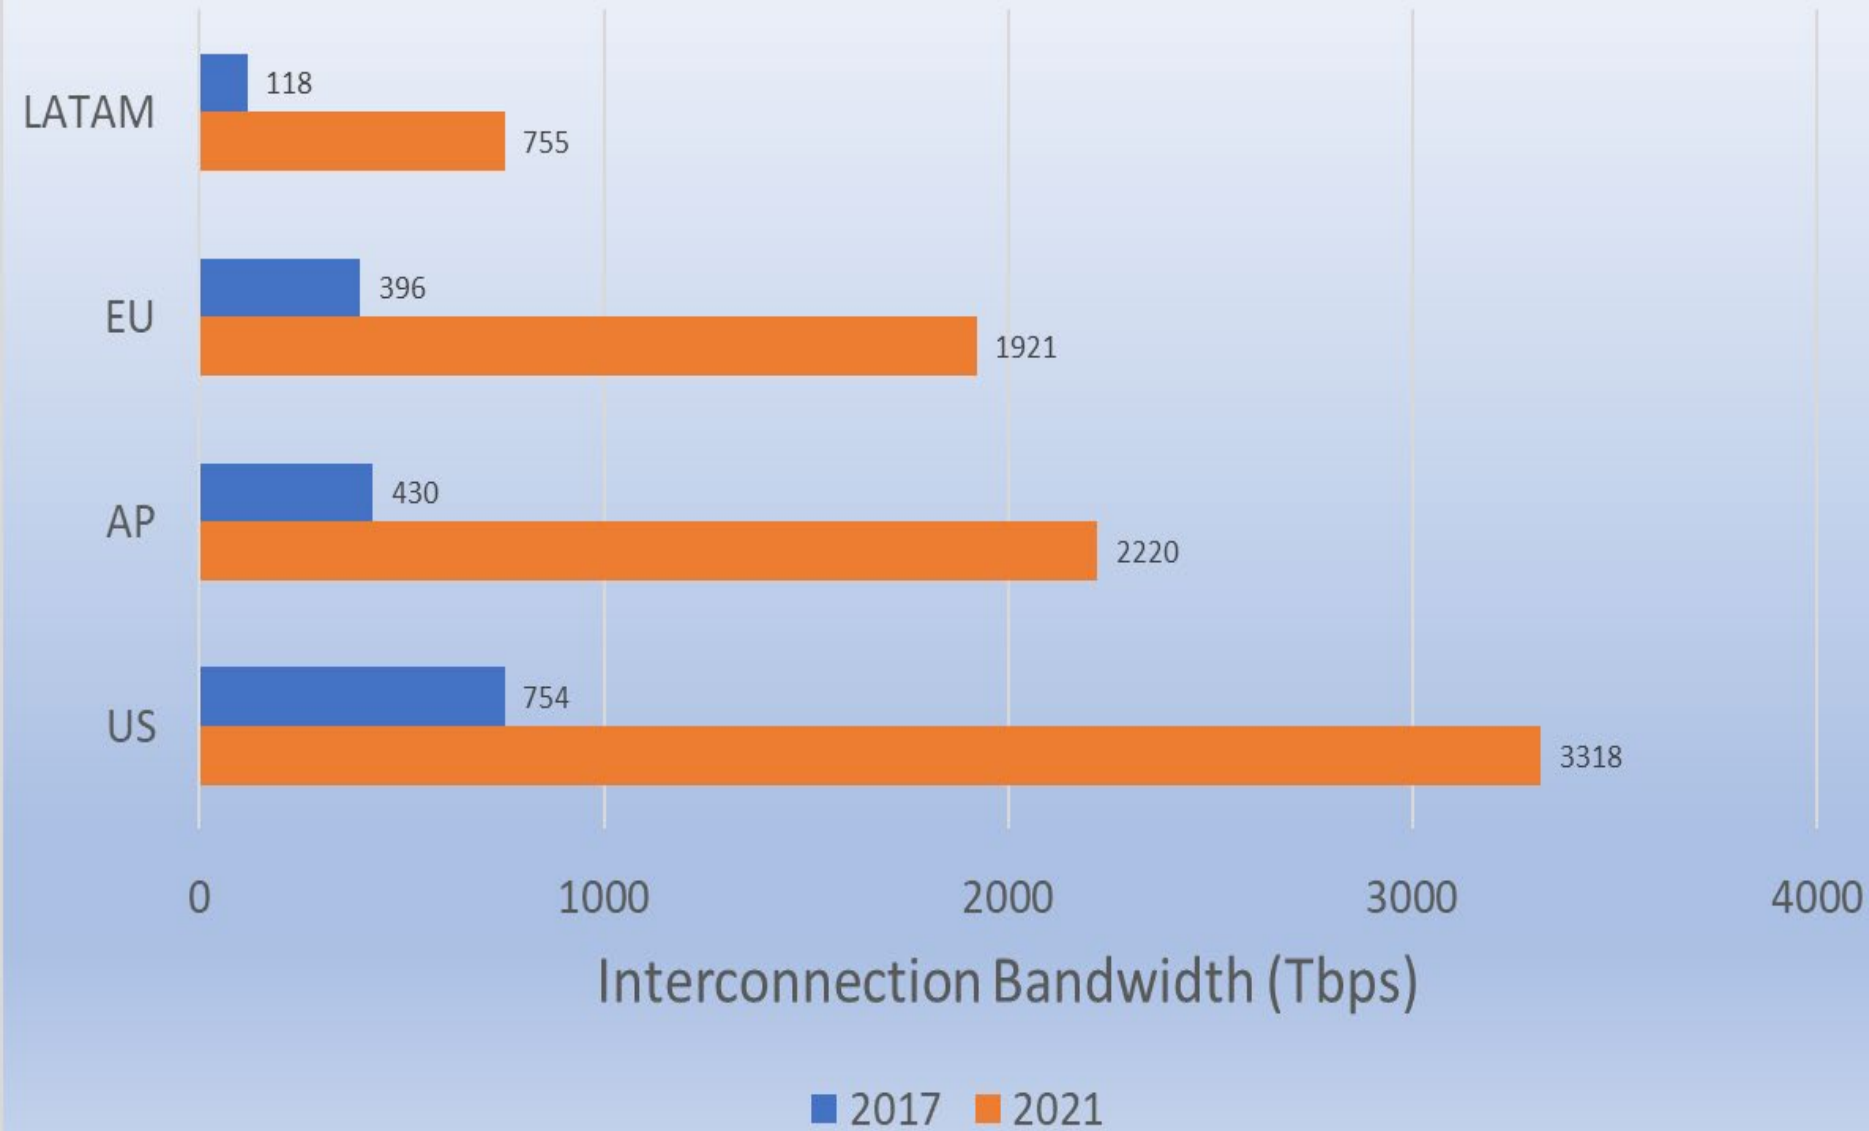

Additional analysis to be provided in the future.
