Discussion & Observations

D'Ambrosia noted up front that there is other data in the noted Equinix report that he did not address with this presentation, and he would be looking at doing a subsequent presentation.

D'Ambrosia indicated he had to fix slides 5 & 6. (Updated noted above).

On slide #12, it was noted that the only real application spaced perceived to have latency issues was "gaming."

D'Ambrosia noted that there was additional comments in the Sandvine paper that discussed latency that he would review and see if there was other additional information to share with the BWA.

The speaker noted the differences in application usage on regional basis.

It was requested that D'Ambrosia add a color code / legend to Slide #15 that indicates what the color boxes meant.

D'Ambrosia showed the Equinix paper to illustrate the other data to be reviewed.

At 10:45am, D'Ambrosia resumed chairing meeting.

Meeting adjourned at approximately 10:50 am ET.
