

The Case for Low Wattage PSEs

Mike McCormack

3Com

Wall Warts for Low Power PDs

- Many PDs are 1/2 power or lower
(Phones, .11 Access Points, Cameras)
- Some sites will not use large port PSEs
(Installed base, SOHO)
- 15.4W PSEs will have 50% or more of their capabilities wasted.
- Wasted capacity is wasted money.

Compromises

- Mandatory Labelling
- Dispensation Only for Single Port PSEs
- Mandatory classification
- MidSpan PSEs only
- Other?
