All my other comments relate to Maintenance requests; if, as I suspect, these are not incorporated in the current review document, the following should be ignored.

SuggestedRemedy

Response　　　　　　*Response Status* **C**

ACCEPT.

Maintenance requests are not incorporated in the current review document.

The current pdf of 802.3 only has bookmarks for 1st and 2nd level headings which matches what they have chosen to do in the table of contents. Many of the level 2 subclauses are 10-20 pages in length so the bookmarks don't get you very close. This is inconvenient and wastes time.

Is there some way we can convince them to put in bookmarks to at least level 3?

It isn't like an extra level gets in the way of readers who don't need it since you choose whether to expand

SuggestedRemedy

Response　　　　　　*Response Status* **C**

ACCEPT IN PRINCIPLE.

Will work with IEEE-SA editorial staff to see if bookmarks to at least level 3 can be included in pdf files.

802.3aj changed the text of the note on 14.4.1 to update the reference to a wiring standard. In the Clause 14 draft for am, the note is deleted rather than updated.
