

Figure 28C-1—Message code #5 sequence

NOTE—Figure 28C-1 shows the order Next Pages are transmitted, with the first transmitted Next Page shown in the leftmost position. While Figures 28-11 and 28-12 use the convention that the most significant bit (i.e. the last bit to be transmitted) is the rightmost bit, Figure 28C-1 uses the opposite convention, i.e., the most significant bit of each page is shown in the leftmost position. This is a pictorial difference only; there is no difference in the actual order of bits transmitted.
