

# OIF liaison report

Tom Palkert

Nov. 2004 San Antonio

# Summary

- CEI 6G short reach, 6G long reach and 11G short reach document sent to Principle member ballot (Final step in OIF procedures before it becomes an Interop agreement)
  - Document sent to 802.3ap also
- CEI 11G Long Reach clause sent to straw ballot.
  - Medium reach clause added

# PLUG (PLL users group) activities

- Proposal to request analysis of 10Gbps operation over ATCA backplanes.
  - Later straw poll indicated that most people would like to wait and see the results of the 802.3ap work.

# 11G Long Reach activities

- Continuous time equalizer has been integrated into Stateeye (Both Continuous time equalizer and DFE are supported)
- 11G medium reach (600mm) test was added
  - Optimized for low power
  - Uses LR TX and SR RX (with extended Vdiff range)

# Activities for next meeting

- Resolve ballot comments
- More Stateye simulation results?
