IEEE-SA Standards Board Bylaws on Patents in Standards

6. Patents

IEEE standards may include the known use of essential patents and patent applications provided the IEEE receives assurance from the patent holder or applicant with respect to patents whose infringement is, or in the case of patent applications, potential future infringement the applicant asserts will be, unavoidable in a compliant implementation of either mandatory or optional portions of the standard [essential patents]. This assurance shall be provided without coercion and prior to approval of the standard (or reaffirmation when a patent or patent application becomes known after initial approval of the standard). This assurance shall be a letter that is in the form of either:

a) A general disclaimer to the effect that the patentee will not enforce any of its present or future patent(s) whose use would be required to implement either mandatory or optional portions of the proposed IEEE standard against any person or entity complying with the standard; or

b) A statement that a license for such implementation will be made available without compensation or under reasonable rates, with reasonable terms and conditions that are demonstrably free of any unfair discrimination.

This assurance shall apply, at a minimum, from the date of the standard's approval to the date of the standard's withdrawal and is irrevocable during that period.

Inappropriate Topics for IEEE WG Meetings

- **Don't discuss the validity/essentiality of patents/patent claims**
- **Don't discuss the cost of specific patent use**
- **Don't discuss licensing terms or conditions**
- **Don't discuss product pricing, territorial restrictions, or market share**
- **Don't discuss ongoing litigation or threatened litigation**
- **Don't be silent if inappropriate topics are discussed... do formally object.**

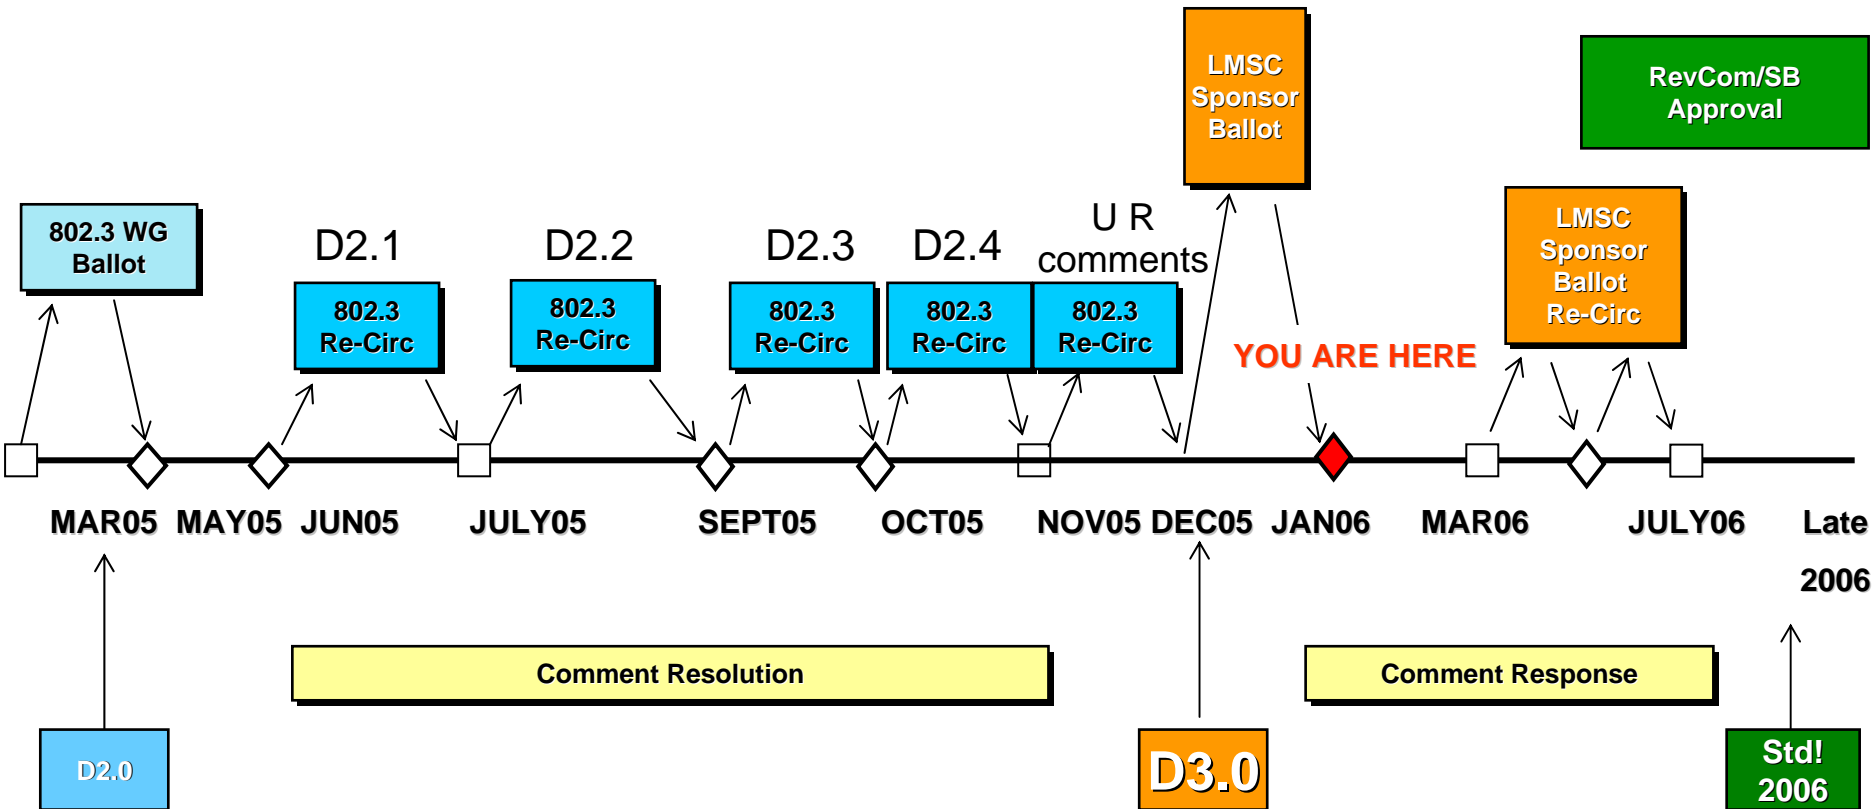

If you have questions, contact the IEEE-SA Standards Board Patent Committee Administrator at patcom@ieee.org or visit <http://standards.ieee.org/board/pat/index.html>

OBJECTIVES

- Use the existing 10GBASE-R PCS
- Support a BER of better than or equal to 10^{-12}
- Support fiber media selected from IEC 60793-2-10:
 - 62.5 μ m
 - 160/500 MHz-km (A1b, 60793-2-10)
 - 200/500 MHz-km (A1b, 60793-2-10)
 - 50 μ m
 - 400/400 (A1a.1, 60793-2-10)
 - 500/500 (A1a.1, 60793-2-10)
 - 1500/500 (A1a.2, 60793-2-10)
- Provide a Physical Layer specification which supports link distances of at least 220 m on 500 MHz.km multimode fiber.

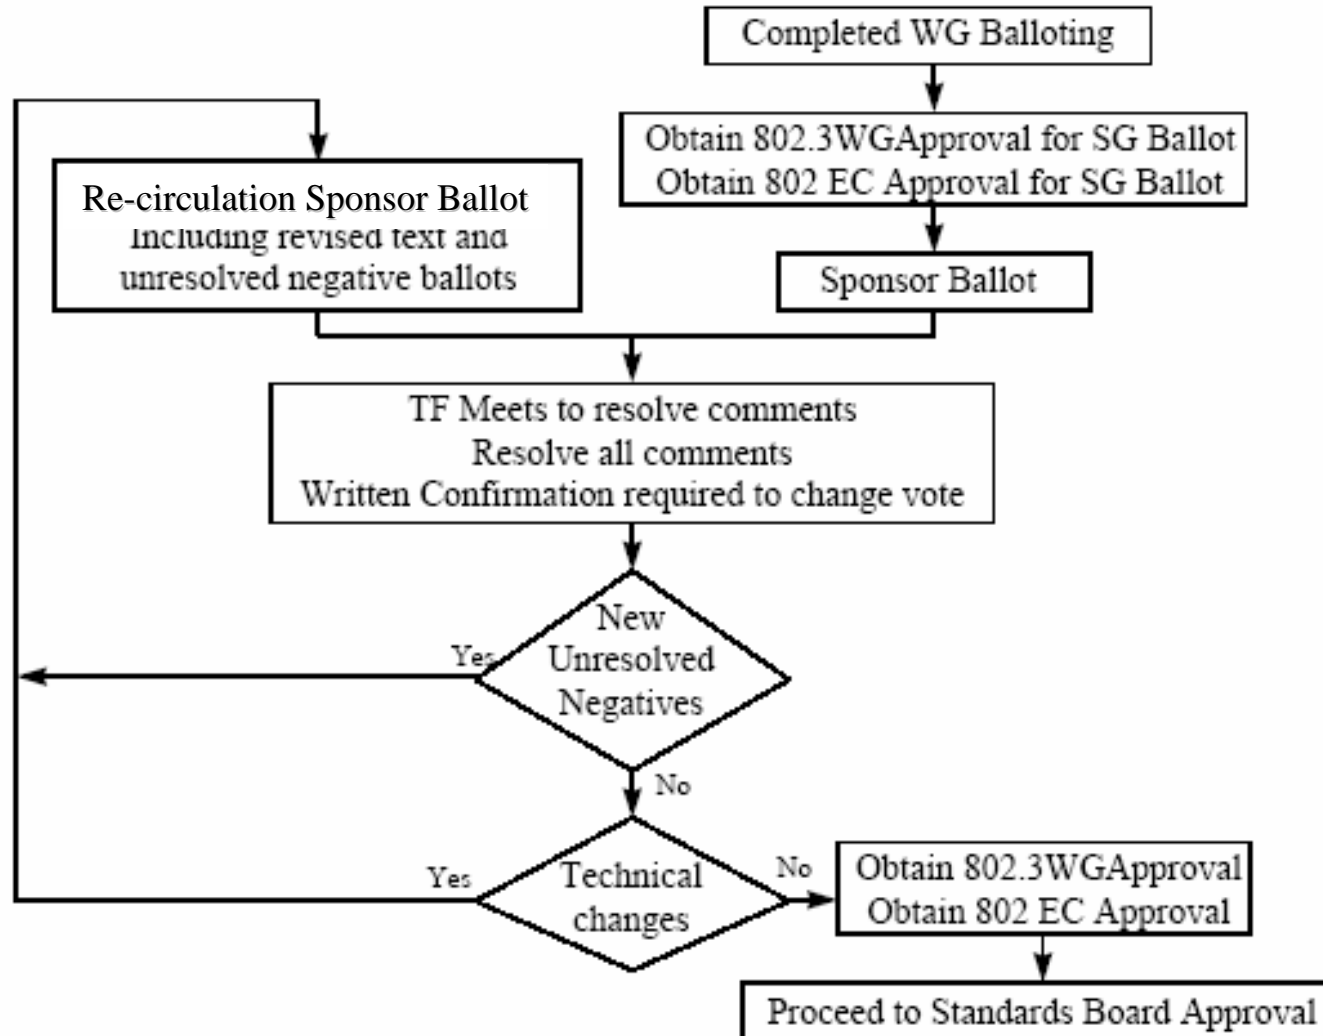

Draft Timeline: 10GBASE-LRM Working Group and Sponsor Ballots.

GOALS FOR THIS MEETING

- **The purpose of the meeting is comment resolution on Draft P802.3aq/D3.0**

SPONSOR BALLOT PROCESS

MyBallot & Comment Resolution

[1] All comments associated with a Disapprove vote that are marked as Must be Satisfied are re-circulated.

[2] Once a comment associated with a Disapprove vote that is marked as Must be Satisfied has been recirculated the requirement to recirculated has been satisfied. The comment will not appear in subsequent comment databases.

[3] Comments cannot be Withdrawn.

Once a comment is submitted it cannot be changed (with the exception of the Must be Satisfied Status if the vote is a Disapprove). After much discussion with staff it was agreed that: [a] If a commenter wishes to withdraw a comment before the ballot closes they can submit a new comment stating that they withdraw the particular comment. [b] if a commenter wishes to withdraw a comment after the ballot close we can mark the comment as Rejected and note that the commenter stated that they wish to withdraw the comment. This has already been implemented in the Comment resolution tool.

[4] Comments cannot be added from the floor
