Revised Definition of *alignmentCorrect* (77.2.2.3)

alignmentCorrect

TYPE: Boolean

This variable is an alias for the following condition
 $((\text{fecOffset} < \text{FEC_PAYLOAD_SIZE}) * (\text{fecOffset}[1:0] = 0)) + \text{!grantStart}$

This variable is set true on column (XGMII transfer) boundaries occurring during the payload part of an FEC codeword. It is reset to false on the with the next increment of *fecOffset*.
