Subject: Approval of P802.3ba

Dear Paul Nikolich:

I am pleased to inform you that on 5 Dec 2007 the IEEE-SA Standards Board approved the above referenced project until 31 Dec 2011. A copy of the file can be found on our website at <https://development.standards.ieee.org/get-file/P802.3ba.pdf?t=18351400024>.

Now that your project has been approved, please forward a roster of participants involved in the development of this project. This request is in accordance with the IEEE-SA Standards Board Operations Manual, Clause 5.1.2i under Duties of the Sponsor which states:

"Submit annually to the IEEE Standards Department an electronic roster of individuals participating on standards projects"

Rosters can be submitted in any format to the NesCom Administrator (nescom-admin@ieee.org). Please forward this list to the NesCom Administrator via e-mail at nescom-admin@ieee.org no later than 4 Mar 2008.

Or, for your convenience, you can manage your standards development roster in myProject. Instructions are as follows:

- * Go to myProject - <https://development.standards.ieee.org/my-site>
- * Login using your IEEE Web Account username and password.
- * Once logged into myProject, go to "Manage Committees"
- * Drill down to the project by clicking the (+) on the left to expand each level. The actual project will be highlighted in yellow
- * Click "Manage Committees" for that project. A list of individuals enrolled in the Committee/Project will appear. On this screen you can assign whether a person is a Participant, a Non-Voting Member or a Voting Member of the project group. You may also view contact information for that individual.

Please visit our website, IEEE Standards Development Online (<http://standards.ieee.org/resources/development/index.html>), for tools, forms and training to assist you in the standards development process. Also, we strongly recommend that a copy of your draft be sent to this office for review prior to the final vote by the working group to allow for a quick review by editorial staff before Sponsor balloting begins.

If you should have any questions, please contact the NesCom Administrator via e-mail at nescom-admin@ieee.org.

4.1 Type of Ballot: Individual	
4.2 Expected Date of Submission for Initial Sponsor Ballot: 2009-11	
4.3 Projected Completion Date for Submittal to RevCom: 2010-05	
5.1 Approximate number of people expected to work on this project: 80	
5.2 Scope of Proposed Standard: Define 802.3 Media Access Control (MAC) parameters, physical layer specifications, and management parameters for the transfer of 802.3 format frames at 40 Gb/s and 100 Gb/s.	Old Scope:
5.3 Is the completion of this standard is dependent upon the completion of another standard: Yes If yes, please explain: IEEE Std 802.3-2005 is currently being revised by the IEEE 802.3ay Task Force (IEEE P802.3). Progression of this project to Sponsor ballot will be contingent on the approval of P802.3.	
5.4 Purpose of Proposed Standard: The purpose of this project is to extend the 802.3 protocol to operating speeds of 40 Gb/s and 100 Gb/s in order to provide a significant increase in bandwidth while maintaining maximum compatibility with the installed base of 802.3 interfaces, previous investment in research and development, and principles of network operation and management. The project is to provide for the interconnection of equipment satisfying the distance requirements of the intended applications.	Old Purpose:
5.5 Need for the Project: The project is necessary to provide a solution for applications that have been demonstrated to need bandwidth beyond the existing capabilities. These include data center, internet exchanges, high performance computing and video-on-demand delivery. Network aggregation and end-station bandwidth requirements are increasing at different rates, and is recognized by the definition of two distinct speeds to serve the appropriate applications.	
5.6 Stakeholders for the Standard: Stakeholders identified to date includes but are not limited to: users and producers of systems and components for servers, network storage, networking systems, high performance computing, telecommunications carriers, and multiple system operators (MSOs).
