

Minutes 2/15/2008 40G SMF PMD Ad Hoc

Recorded that every participant had a chance to read the patent policy prior to the meeting.

Provided an opportunity to identify patent claims or patent applications claims. None was reported.

Review of carter_40_01_0208

- Need to wait for more integration to come around for 40GE SMF?
- A comment was made that 40G will impact 100G volumes. Needs to take this into account for BMP analysis.
- Noted that 40G SMF will delay of 100G.

Review of cole_40_02_0208

- Want to see economic feasibility on switch/system side. Not just optics.
- If the SMF 4x10 approach is used also for MMF what is the impact on MMF?
- Form factor proliferation if SMF is allowed: QSFP and Cpak. What is the impact on switching ports?

Attendees (recorded by email response)

Gary Nicholl, Cisco
Chris Cole, Finisar
John Jaeger, Infinera
Justin Abbott, Gennum Corporation
Mark Nowell, Cisco
Schelto vanDoorn, independent
Norbert Folkens, JDSU
Larry Green, IXIA
Serbay Murat, MergeOptics
Fiere Julien, MergeOptics
Tom Palkert from Luxtera
Steve Song, Excelight
Eddie Tsumura, Excelight
Alessandro Barbieri, Cisco
Steve Swanson, Corning
Michael Frankel, Ciena
Paul Kolesar, CommScope Inc.
Hidenori Takahashi, KDDI R&D Laboratories Inc.
George Young, AT&T Labs, Inc.
Frank Chang, Vitesse
