

Illustrating comment 345 (nPPI minimum host loss)

Prepared to assist comment resolution

Piers Dawe, IPtronics

Comment proposes changing the recommended minimum loss of the nPPI host PCB, connector and HCB

Chart on next page shows the effect on the signal/echo ratio up to 4 MHz

Blue: per D3.0

Red: consequence of minimum loss proposed in comment 345 and illustrated in slide 8 of anslow_06_0110

The echo is that caused by reflections between host IC and module

Echo/signal ratios
