

Example TxVEC measurement

Piers Dawe

Mellanox Technologies

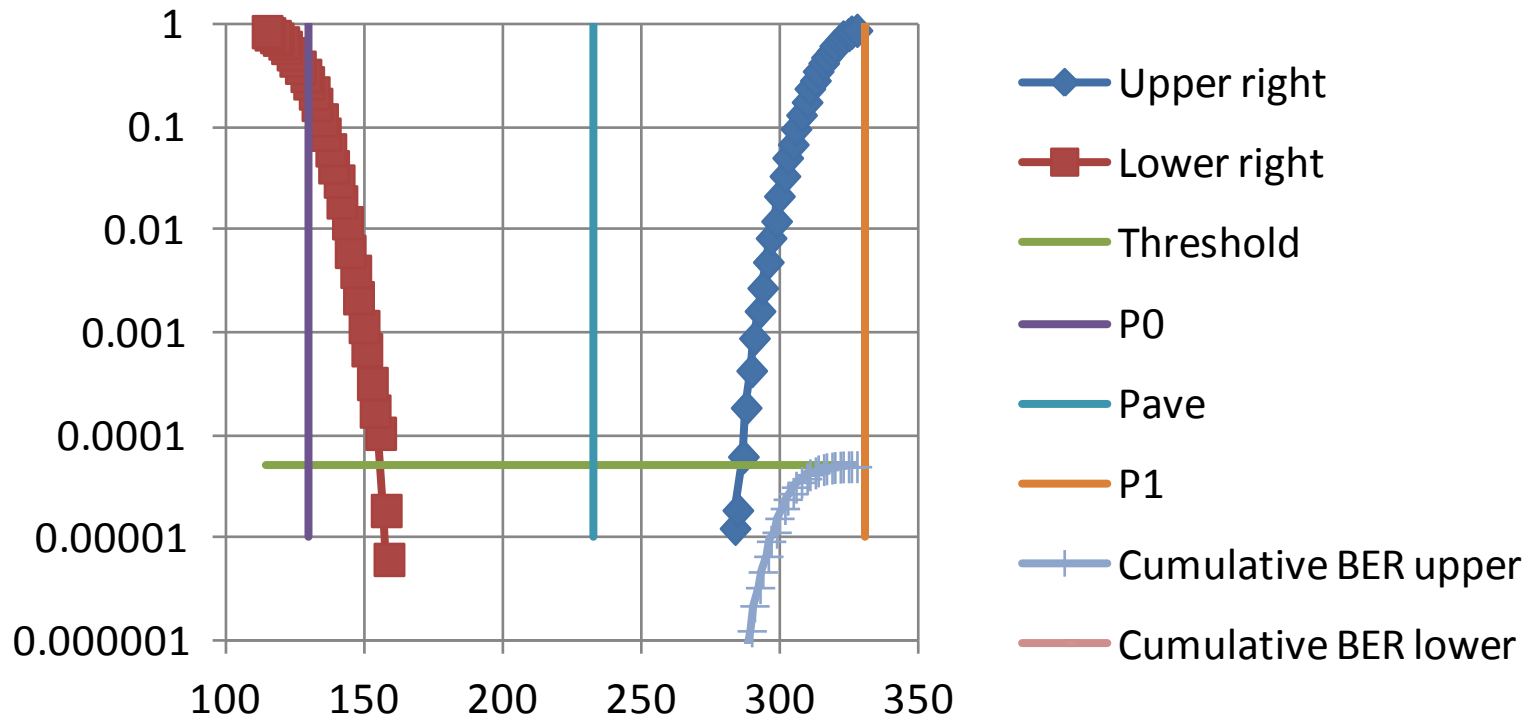

Worse of two histogram pairs

- Outermost point includes all the outside tails
 - Lumping them together like this causes negligible difference

Log scale

Cumulative fractions of hits or errors

Results of three methods

Method	Numerator	Upper histogram	Lower histogram	
Percentile	Per histogram	2.69	1.29	dB
Percentile	OMA/2	2.79	1.24	dB
Noise adding	OMA/2	0.81		dB
