The order of IEEE 802.3 amendments is to have all annexes after all clauses (as it was in D3.0), as shown in the 802.3 FrameMaker template. In D3.1, Annex A and Annex 31A are interleaved with the clauses. Why was this change made?

SuggestedRemedy

Move Annex A and Annex 31A to be after Clause 103

 Change "uses" to "can use". CLT needs to ensure that it meets a desired confidence interval provided by the manufacture. For example, the statement as written would permit the CLT to use only one upstream probe symbol, which would not create confidence.

Incorrect base text for Table 45-3. IEEE Std 802.3bw-2015 has 1.17 listed as a single reserved row because 802.3bw defined 1.18. No need to change reserved rows except 1.17. The new reserved row in this draft also conflicts with definition of 1.19 in P802.3by.

SuggestedRemedy

Change editorial instruction to simply read, Change the 1.17 row of Table 45-3 (as modified by IEEE Std 802.3bw) as shown below. Only show 1.17 row in Table 45-3 changes with Reserved in strikethrough and new register name and subclause underscore.

Incorrect base text for Table 45-3. IEEE Std 802.3bw-2015 has changed the reserved row in 802.3-2015 (what is includede in the current draft) to define registers starting at 1.2100.

SuggestedRemedy

The 32767 should be 2099 in first (strikethrough text) and last (plain text) row of the changes. Add ("as modified by IEEE Std 802.3bw)" to the editing instruction to indicate where the correct base text is found.
