C. Multipoint MAC Control for EPoC

C.1 Overview

C.1.1 Goals and objectives

C.1.2 Position of Multipoint MAC Control within the IEEE 802.3 hierarchy

C.1.3 Functional block diagram

C.1.4 Service interfaces

C.1.5 State diagram conventions

C.2 Multipoint MAC Control operation

C.2.1 Principles of Multipoint MAC Control

C.2.1.1   Ranging and Timing Process

C.2.2 Multipoint transmission control, Control Parser, and Control Multiplexer

C.2.2.1   Constants
C.2.2.2   Counters
C.2.2.3   Variables
C.2.2.4   Functions
C.2.2.5   Timers
C.2.2.6   Messages
C.2.2.7   State Diagrams

C.3 Multipoint Control Protocol (MPCP)

C.3.1 Principles of Multipoint Control Protocol

C.3.2 Compatibility considerations

C.3.2.1   PAUSE operation
C.3.2.2   Optional Shared LAN Emulation
C.3.2.3   Multicast and single copy broadcast support
C.3.2.4   Delay requirements

C.3.3 Discovery Processing

C.3.3.1   Constants .. State Diagrams

C.3.4 Report Processing

C.3.4.1-7 Constants .. State Diagrams

C.3.5 Gate Processing

C.3.5.1-7 Constants .. State Diagrams

C.3.6 MPCPDU structure and encoding

C.3.6.1   GATE description
C.3.6.2   REPORT description
C.3.6.3   REGISTER_REQ description
C.3.6.4   REGISTER description
C.3.6.5   REGISTER_ACK description

C.4 Protocol implementation conformance statement (PICS) proforma for Clause C, Multipoint MAC Control for EPoC
