P802.3bn EPoC Work Item and Socialization conference call – Minutes Wednesday, August 13, 2014

Meeting opened: 10:35 am pacific Meeting closed: 11:53 am pacific

## IEEE-SA Call for potentially essential patents. Refer to:

- https://development.standards.ieee.org/myproject/Public/mytools/mob/slideset.pdf
- Response to call: no response to request.

## Presentation / Socialization / Discussion Items

- Duane Remein, discussion items:
  - Use of MDIO registers or not?
    - Feedback: MDIO is an option in 802.3, not required. EPoC can't require it in the PHY Link. Suggested approach: define variables in Clause 100-102. More discussion on reflector.
  - Scheduling the Probe period
    - Summary of discussion on reflector. Will continue there. Standard needs to specify what is necessary for interoperability and auto-negotiation. Otherwise, when/how CTL schedules use of Probes and Fine Ranging is up to implementation/vendor.
- Duane: <u>PMA exclusion rules</u>
- Duane: Next FEC codeword pointer. Changing NCP to FCP to avoid conflict with N<sub>CP</sub>. More info on reflector for both the above.

Attendance.
