

Proposed Equation 97-7

$$S_n = \begin{cases} Scr_n[0] \oplus InfoField_{(n \bmod 180)} & 2520 \leq (n \bmod 2700) \leq 2615 \\ Scr_n[0] \oplus 1 & \text{else if } (n \bmod 180) = 0 \\ Scr_n[0] & \text{otherwise} \end{cases}$$

1. On page 96 line 3, it says InfoField is from bits 2520 to 2615.
2. Change “Infofield” to “InfoField”.
3. Instead of “ $n \bmod \dots$ ”, use “ $n \bmod \dots$ ”.
