Andre reminded everyone of the updated IEEE patent policy (http://www.ieee802.org/3/patent.html) and asked if anyone was unfamiliar with it. No one responded.

Andre asked if anyone had any objection or additions to the draft agenda. No one responded, so this agenda was approved by the Ad Hoc.

Andre asked if anyone had any corrections to the draft minutes from the 6th June 2016 call. No one responded, so these minutes are approved by the Ad Hoc.

Presentation #1
Title: Electrical Interface Ad Hoc Opening/Agenda
Presenter: Andre Szczepanek, Inphi

Andre presented a slide showing two "editors's comments" he intended to enter against D1.4. Peter Anslow pointed out that the second item referenced the wrong sub-clause, and that it should reference 120D.3.1.1. Andre updated the slide accordingly.

Andre then presented again his slide listing "Areas for further work. On the first item related to Tcoils, Yasuo Hidaka indicated he had not yet had any response to his request for information at the last ad hoc. On the second item Peter Anslow pointed out that the Even/Odd jitter sub-clause in Annex 120E is redundant and should be removed before WG ballot. There was general agreement that this is the right thing to do, and Andre will enter a comment to remove it. On the third item related to removal of the Vertical Eye closure test, concern was expressed that more information needs to presented to justify its removal. In any case retaining the test is benign.

The meeting adjourned at 8:20 am Pacific.
