

## Comment #91 D2.2

Missing INRUSH state

### Proposed Remedy:

1. In page 150, line 51: Change the exit label name from MDI\_POWER1 to INRUSH
2. Delete editor note in page 151 lines 5-6.
3. Add to following INRUSH state to Figure 33-33 page 151 line 7 as follows:

### Add the following variable:

pd\_current\_limit\_mode(M)

Control on Mode M limiting the input current to a value conforming to  $I_{inrush\_PD-2P}$ , as defined in Table 33-30.

Values:

FALSE: The PD is not required to control the input current.

TRUE: The PD is required to control the input current.
