

Proposed Remedy for comment #44 clause 33.2.8.4.1 page 109 line 1

Replace Rpse_min and Rpse_max definitions from:

RPSE_max is the maximum PSE common mode effective resistance in the powered pairs of the same polarity.

RPSE_min is the minimum PSE common mode effective resistance in the powered pairs of the same polarity.

To:

Rpse_min is the lower PSE common mode effective resistance in the powered pairs of the same polarity.

Rpse_max is, given *Rpse_min*, the highest allowable common mode effective resistance in the powered pairs of the same polarity.
