RITT consensus building report

Adee Ran

bookkeeping

So far we had

- 2 conference calls

- 1 presentation

- 14 participants

Another meeting scheduled for today (12 pm Pacific time)

Items in discussion

- Make cable testing possible with transmitter being either test equipment or a compliant device
  - Make it similar to the backplane tests
  - Challenge is to keep results consistent
  - Consensus seems possible
- Address the "added host loss board" added in D2.2
  - Currently not specified at all
- Transition-time measurement and filter
- Long cable vs. compliant cable and transmit-side PCB
