802.3cb Task Force Architecture Ad Hoc Report

Dan Smith, Seagate

2016-03-14

Goals of Architecture ad hoc meetings

<u>Charter:</u>

- The charter of the 2.5G/5G Ethernet Backplane and Copper Task Force Architecture Ad Hoc is to discuss the different areas of work (RS/PCS/FEC/PMDs/AN/EEE) that will fall under the work of the task force and to prepare content, and contributions towards the project goal of developing standard.

Architecture Ad Hoc Calls

- 7 Ad Hoc webex after January 2016 Interim.
- Materials posted @ usual path (appended to SG area) http://www.ieee802.org/3/CU4HDDSG/public/archadhoc/
  - Good balance of 802.3 voters and new storage-centric colleagues.
- Major Topics
  - Consider substantial contributions toward the baseline draft texts.
  - Helped to converge on backplane channel specification.

- Intent to re-start the call between this Plenary and May 2016 Interim.

Thank You!
