- Yasuo Hidaka, Fujitsu

## Transmitter Test Set-Up for Clause 137

## Test fixture

- Use fixture (tp0 to tp0a) with 1.4 dB at 12.89 GHz because other values must be account for.

That equates to 33 mm of the board transmission line specified in clause 92 at 100 ohms characteristic impedance

## 93:8.1.1 Transmitter test fixture

 showmin Eigure 9 gis-5

The insertion lossof the tegt fixtureshall be between 12 2dB and $1.6 . \mathrm{dB}$ at 12.89 GHz The magnitude of the

Thercferencefinsertion loss:of the test fixture is defined by Equation (93) Where fist the frequency in (GHz

[^0]
## Test Conditions for drive swing

$\square A_{v}$ and $A_{f e}$

- Limiting factor is Tx spec: Vf min $=0.4 \mathrm{v}$
- which meets $\mathrm{v}_{\mathrm{f}}$ /peak ratio (0.75)
- Vf determined with $\mathrm{Nv}=15$ for dfe12
- 12 UI from peak
- For considered values of $R_{d}$ and $Z_{c}$
$\square A_{\text {ne }}$
vp-p

```
- Limiting factor is Tx spec: Vp-p 1200 mV
- which meets \(\mathrm{v}_{\mathrm{f}} /\) peak ratio
- Vp-p < 1200 mV for PRBS31 (Vp=0.6 v)
- 72 UI from peak
- For considered values of \(R_{d}\) and \(Z_{c}\)

\section*{Recommendations}
- For Clause 136 (Table 136-11) set SNR \(_{\mid \text {| } \mid}\) min to 30 dB
- Allowing for about a dB of measurement error
\(\square\) For Clause 137 set SNR \(_{\text {ISI }}\) min to 43 dB
- 137.9.2 table: add 120D-1 modifications
- Allowing for about 2 dB of measurement error
\(\square\) Adjust drive amplitudes in COM according to tables in slides 5 and 6
- Resolve COM parameters for \(\mathrm{Z}_{\mathrm{c}}\) and \(\mathrm{R}_{\mathrm{d}}\) in Ad Hoc
\(\square\) Address Peak/Vf in Ad Hoc
- Values are a little high for clause 136
- Values are a little low for clause 137
- \(\mathrm{V}_{\mathrm{f}}\) values are also a bit high in COM package model```

[^0]:    The effects of differences between the insertion loss of an actual test fixture and the reference insertion loss are to be accounted for in the measurements. The reference insertion loss is illustrated in Figure 93-3).
