Presentations/Discussion.

Ethernet Link OAM   Yan Zhuang   Huawei Technologies

o Reviewing the current model vs 802.3.1 and clause 30/57 shows some issues to fix.
o 802.3.1 OAM MIB has (at least) one item (dot3OamLoopbackIgnoreRx) that is not defined in clause 30/57.
o To handle this (and other similar cases we may find), propose to:
   ▪ Add YANG module comment.
   ▪ Add Editors note.
o If we decide something needs to be added, to clause 57 it probably needs a 802.3 maintenance request.

Discussion on NMDA-compatible   Yan Zhuang   Huawei Technologies

o Discussion of status of NDMA work in IETF.
o We want to do the work to make and review the changes in TF, not in WB or SB.
   ▪ Really our job as a TF to get this done.
o Proposal on call is to take option 1 – change to NDMA while still in TF.

Meeting closed – 7:50 PT
