Discussion

General Discussion about presentation.

It was suggested that an ad hoc session be set up on addressing how to write specifications so users would be able to identify which parts will interoperate with each other. It was also suggested that members of the SuperPon (P802.3cs) be invited to enable a common approach for IEEE 802.3 address this issue.

In discussing the start channel, the question was raised regarding what is the application need?

Chair requested status of proposals with participants on the call.

Chair noted that there would be no ad hoc call on April 11.

Meeting adjourned at approximately 11:05 am ET.
