Background

- Measurement configuration results for LTspice model validation demonstrated.
 - Transient analysis for RX eye
https://www.ieee802.org/3/da/public/051921/diminico_SPMD_01_0521.pdf
- New cable model developed to use with transient analysis for RX eye
 - Cable model transmission characteristics consistent with cable model developed.
https://www.ieee802.org/3/da/public/0721/diminico_SPMD_01_0721.pdf
- New cable model developed to consider Link Segment Node Distribution with transient analysis for RX eye
 - Cable model transmission characteristics consistent with prior 18 AWG cable model
 - Transient analysis of 75 m node distributions
https://grouper.ieee.org/groups/802/3/SPMD/usecase/SPMD_Usecase_Library.pdf
- Clumped distribution transient analysis for RX eye
https://www.ieee802.org/3/da/public/100621/diminico_SPMD_01b_100621.pdf
- Capacitive compensation via inductance(s)
https://www.ieee802.org/3/da/public/1121/diminico_SPMD_01_1121.pdf

Purpose

- 802.3da desired use cases may be possible to support with capacitive compensation via inductance(s).
- Does not preclude interoperability with Clause 147 multidrop

Use Cases	No. of Nodes	Length, meters
	Minimum/Desired	Minimum/Desired
Lighting Controls	8/16	30/50
Industrial Edge Networks	8/32	50/75
Industrial In-Cabinet Usage	40/64	25/75
Elevators	16/24	50/75

-MDI impedance limit parameters			
Parameter name	Unit of measure	Minimum value	Maximum value
R	$k\Omega$	10	—
L	μH	80	—
C_{tot}	pF	—	180
C_{node}	pF	—	15

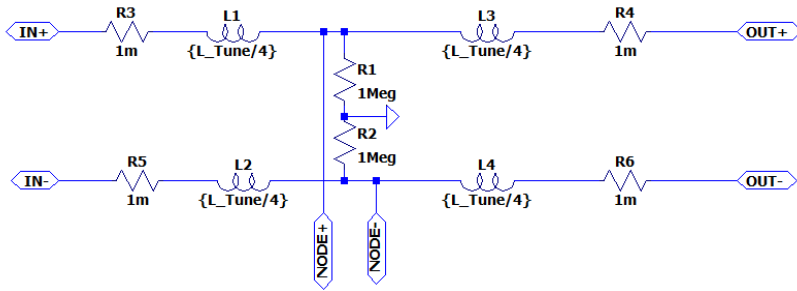

Source: IEEE Std 802.3cg™-2019

Multidrop Topology - clumped compensated

inductances incorporated in stub connectors

4X80 nH inductances

- x m, x node, clumped topology
- 80 uH, 30 pF node parasitics
- 10 cm stub lengths
- 4X80 nH inductances

Multidrop Topology - 75m - 30 node

PoDL

No PoDL

- 75 m, 30 node, clumped topology
- 80 uH, 30 pF node parasitics
- 10 cm stub lengths
- 4X80 nH inductances

Multidrop Topology - 75m - 30 node

PoDL

No PoDL

- 75 m, 30 node, clumped topology
- 80 uH, 30 pF node parasitics
- 10 cm stub lengths
- 4X80 nH inductances

Multidrop Topology - 75m - 35 node

PoDL

No PoDL

- 75 m, 35 node, clumped topology
- 80 μ H, 30 pF node parasitics
- 10 cm stub lengths
- 4X80 nH inductances

Multidrop Topology - 75m - 40 node

PoDL

No PoDL

- 75 m, 40 node, clumped topology
- 80 uH, 30 pF node parasitics
- 10 cm stub lengths
- 4X80 nH inductances

Summary

- 802.3da desired use cases may be possible to support with capacitive compensation via inductance(s).
- Does not preclude interoperability with Clause 147 multidrop

Use Cases	No. of Nodes	Length, meters
	Minimum/Desired	Minimum/Desired
Lighting Controls	8/16	30/50
Industrial Edge Networks	8/32	50/75
Industrial In-Cabinet Usage	40/64	25/75
Elevators	16/24	50/75

- 75 m - 30 nodes supportable with PoDL
- 75 m - > 30 nodes supportable without PoDL
