Key Issues

- ✦ Agreement on a PMD set that is cost-effective for both P2P and P2MP. Distributing homework for March baseline proposals.
- ✦ Merits of adding 100M Ethernet to the objectives.
- ✦ Operating range of P2MP – should the standard stop at 10 km?
- ✦ Examination of FEC cost and performance.
- ✦ Analog Video Overlay – choosing a set of optical parameters to include in our scope of work.
